Here's some photos of the ladies from SCPRT finance who came today to the snake interpretive program at Aiken State Park. Ranger David Finney explained the difference between venomous and non-venomous snakes, which one are more prevalent to South Carolina and how to co-exist with the reptiles. Some of the visitors even held a snake. And the biggest surprise was a baby rough green snake which he had caught just a few days ago. It has since been released into the wild. He also had two corn snakes: one of which is his own which he recently rescued when a man could no longer take care of it; the other is the park's resident interpretive snake, Bobby Jr. All photos by Valli Finney, David's wife. Please feel free to use the photos. I would like credit, if possible. Enjoy! I'll be sending these to the ladies also...JPG 5657 shows an aquarium with the little rough green snake in it. Can you find it? JPG 5664 shows how tiny the little guy is....David is holding it...

A family showed with a little girl of about five, but they didn't stay long. The little girl has been coming swimming this week, learning how to, that is. Her name is Emma and she is a typical little one, concentration not there for longer than a few minutes...It was overcast and when it is, not a lot of people come out during the week.

I don't know if you can do it, but anyone who brings in a receipt or park pass to my cafe gets 20 percent off. I'm located between Williston and Elko in Barnwell County on Highway 78. I'm about 20 minutes from Aiken State Park and about 10 minutes from Barnwell State Park. I do vegan, vegetarian, diabetic and gluten-free items (including sweeties and other goodies) and have "normal" food. Everything is made from scratch!!!! (Well, except some of my breads). I also have a daily blue plate special which I put on my FB page... Could you at

least "like" my page please? Thanks....Valli
