

Cultural Resources Project Screening Form

File Number: PIN: Route: County:

Project Name:

Type 1: Resurfacing, installation of fencing, signs, pavement markings, traffic signals, passenger shelters, railroad warning devices, installation of rumble strips, and landscaping

Project Type

Type 2: Bridge replacements on alignment, construction of bicycle/pedestrian facilities, and intersection improvements

Type 3: Projects that do not fall into Type 1 and Type 2 categories (e.g. road widening)

Comments

This project consists of the replacement of the bridge that carries S-51 (East Academy St.) over a small unnamed stream. An initial cultural resources survey conducted on 11-1-18 covered the study area for the bridge replacement as then defined. This form reports on the results of a survey of an approx. 600 ft. x 250 ft. parcel that was added to the study area after the original investigation. Background review indicated that there were no previously recorded resources on the parcel and that about 1/3 of the parcel consisted of poorly drained soils. Historical maps and aerial photos indicated that a small farmstead was present on the western end of the parcel in the mid-20th century. A field survey of the parcel was conducted on 12/6/18 and consisted of a pedestrian reconnaissance and the excavation of two STPs. Both STPs were negative and the majority of the parcel evinced a low probability to be the location of previously unrecorded cultural resources based local topography. The remains of the 20th century farmstead visible on historical aerial photos were noted but determined not NRHP eligible. They will be recorded as a non-significant archaeological site. No additional cultural resources investigations are recommended.

Effect Determination:

*SHPO consultation is required for all Type 3 projects and any project with a No Adverse or Adverse Effect Determination.

This screening form was developed to satisfy documentation requirements for Type I and Type II projects under a Programmatic Agreement between the Federal Highway Administration, the South Carolina State Historic Preservation Office, the US Army Corps of Engineers, and the South Carolina Department of Transportation. For Type I and Type II projects that have no effect on historic properties, the completion of this screening form with supporting documentation (e.g. ArchSite Map) provides evidence of FHWA and SCDOT's compliance with Section 106 of the National Historic Preservation Act.
