Every government agency has unique fleet management requirements. In this webinar you will learn to use three specialized products that can enhance your fleet management solution.

- **Driver ID** lets fleet managers know which driver is operating which vehicle at all times—automatically. Learn how to track driver performance, identify problem behaviors, and be alerted to unauthorized vehicle use.
- **Asset tracking** protects your investment in high-value equipment in three ways. Learn how monitoring asset location and movement can improve response times, protect equipment from theft and connect the right vehicle to the right asset.
- **Compliance regulation responsibilities** can be simplified when integrated into fleet management software. See how to electronically manage driver and vehicle inspection reports, hours of service, fuel taxes and more.
