Subject: Interview with Governor -WSSB-NPR station

Mr. Veldran,

I am writing to request a short 30 minute interview with Governor Nikki Haley for our show "Health Matters," which airs on WSSB-FM 90.3 NPR affiliated radio station in Orangeburg, SC. I am director of community development at Family Health Centers, Inc which treated 20,995 patients last year and has 7 centers across the state. The organization is growing and is on the cutting edge of medicine with telemedicine and mobile health units treating rural patients in the region. The show, "Health Matters," covers a number of issues like veterans care, telehealth, diabetes, and heart disease.

We would love to have Governor Nikki Haley as our guest to discuss health care in our studio located on the campus of South Carolina State University. On September 1st, we'll have as our guests Senator John Mathews and representative Gilda Cobb Hunter. If the Governor would like to come on the show with another legislator, we can also do that.

Governor Haley can be interviewed by phone if that's more convenient, but again, we would love to have her at our studios. I can also come to her office in Columbia to interview her. As a former

television reporter at WJLA-TV in Washington, DC, I would also like a television crew to tape the interview for viewing on our website which we are currently re-designing.

"Health Matters" tapes every Tuesday at 1pm. We can accommodate the Governor on any Tuesday that she has available or we will arrange our schedule to accommodate her schedule.

I will also provide questions for her in advance of the show.

Thank you for your consideration. I can be reached at Family Health Centers, Inc., at 803-531-6917 or on my cell at 843-230-3254.

Thanks again. I hope to hear from you soon.

Gayle K. Andrews
