Removal of Roads From State Highway Secondary System

Ownership reverts to local government having jurisdiction (city or county). Approval of deletion or removal by local government is not required.

Correction of Description of State Highways

The Department recommends Commission approval of the correction of the description of sections of State Highway previously added to the State Highway System. The description of roads currently in the State Highway Secondary System may be changed for relocation purposes, to revise the description of the termini to show what was actually constructed by contract, county line changes, or a change in the secondary road number.

Detailed information concerning each of these requests is attached.

Recommendations 5-19-2005

REVISION OF DESCRIPTION OF ROAD ADDED TO THE STATE HIGHWAY SYSTEM

It is recommended the Commission correct the descriptions of sections of State Highway previously added to the State Highway System to read as follows:

| <u>Addition Number</u> | <u>Description</u> |
|------------------------|---|
| | <u>Greenville County</u> (23) |
| | (Commissioner Turner – District #4) |
| 1113 | A frontage road south of I-185 from S-245 (Milepost 43) southwesterly - approximately 0.76 mile (Designated S-1113) (Added to System 3-16-1989) (Revised 4-27-2000) |

Note: The above description is recommended to show the correct beginning point as S-245 and not SC Route 25. File 23.499A relocated S-1113 so it now ends at S-245 instead of US Route 25.

Additions to State Highway Secondary System

May 19, 2005

The Department recommends Commission approval to add sections of road to the State Highway Secondary System for construction and maintenance. The Department may add roads to the State Highway Secondary System by request of the County Transportation Committees contingent on mileage being available under the current mileage cap. Roads may be added to the State Secondary System by the construction of a new roadway, accepting existing county/city roads into our Secondary System by the swap method, or by county line changes. Roads added to the State Highway System must be constructed to Department standards or reviewed for compliance with Department standards.

Detailed information concerning each of these requests follows.
