#### **Suicide Risk and Risk of Death Among Recent Veterans**

Among deployed and non-deployed active duty veterans who served during the Iraq or Afghanistan wars between 2001 and 2007, the rate of suicide was greatest the first 3 years after leaving service, according to a recent study. Compared to the U.S. population, both deployed and non-deployed veterans had a higher risk of suicide, but a lower risk of death from other causes combined. Deployed veterans also had a lower risk of suicide compared to non-deployed veterans.
