Subject: eBay items

I have an idea but I don't know if this is something that we could do? We have old surplus office items such as toners for printers, projector light bulbs, toner for faxes etc that we no longer use because equipment for these items have been updated. I'm sure other offices have items that someone could use outside of DMV. Maybe these things can be sold on eBay for the Department?

Trying to create money for the Department, this is just a suggestion.
