

Cultural Resources Project Screening Form

File Number: PIN: Route: County:

Project Name:

Type 1: Resurfacing, installation of fencing, signs, pavement markings, traffic signals, passenger shelters, railroad warning devices, installation of rumble strips, and landscaping

Project Type

Type 2: Bridge replacements on alignment, construction of bicycle/pedestrian facilities, and intersection improvements

Type 3: Projects that do not fall into Type 1 and Type 2 categories (e.g. road widening)

Comments

This project replaces the bridge carrying S-764 over Hanging Rock Creek. The project area is about 1,120 ft long, centered on the bridge, and reaches up to 86 ft in width. The architectural area of potential effect is a 300 ft buffer around the project area. Background review using ArchSite and historical imagery found no previously recorded cultural resources within or in the vicinity of the project area. SCDOT records indicate the bridge to be replaced (Asset ID 3353) is recorded as historic but recommended not eligible to the National Register of Historic Places (NRHP). A cultural resources field survey was conducted 8/26/2019 consisting of a pedestrian reconnaissance augmented by the excavation of 4 shovel test pits (STP). Eighteen additional STP locations were investigated but not excavated due to slope or ground disturbance. A 2003 addition to Kershaw Golf Club borders the NW. Proposed improvements will not impact the golf course. No cultural material was identified from STPs. Two historic resources (Site Nos 1195 and 1196) were recorded and consist of a vacant utility building ca. 1966 with an outbuilding (1195.01) and a road berm (1105.02) and a late 19th century railroad line; all recommended not eligible for the NRHP. No additional cultural resources are recommended.

Effect Determination:

*SHPO consultation is required for all Type 3 projects and any project with a No Adverse or Adverse Effect Determination.

This screening form was developed to satisfy documentation requirements for Type I and Type II projects under a Programmatic Agreement between the Federal Highway Administration, the South Carolina State Historic Preservation Office, the US Army Corps of Engineers, and the South Carolina Department of Transportation. For Type I and Type II projects that have no effect on historic properties, the completion of this screening form with supporting documentation (e.g. ArchSite Map) provides evidence of FHWA and SCDOT's compliance with Section 106 of the National Historic Preservation Act.
