This is written by my daughter, which I am very proud of. Read it, believe it, and sign it. I was there and couldn't help her, I could only love her and pray.

i'm signing this petition as I would like to raise awareness about endometriosis. Very little is known about this disease. I've have suffered from the age of 12 and am now 33 still hoping and praying for a cure. It took years of doctors & and being told all the symptoms I experienced were all in my head, which only made things even more difficult. Finally after many years i found a doctor who diagnosed me when i was 22 years old, with endometriosis and that I'd probably would never be able to concieve naturally. I would like to reach out to other

women as i know how difficult it is to manage a disease & infertility. Also as i'm asian periods are kind of a taboo subject and alot of women may be embarrassed to speak about their symptoms. I feel It's time to break the silence and reach out to one another and support each other. No women should ever feel she is alone in this battle. My main goal is to help people have a better understanding of the disease and most importantly, to get information out about endometriosis, so hopefully a cure can be found for the millions of women who suffer this debilitating disease.

I am 1 of the 176 million women with endometriosis. We need a real cure and we need better trained and more compassionate doctors and nurses. We need a change.
