Subject: State taxes and State competing with Media

---

Gov Haley on another issue , I want you and Duane Parrish to know selling advertising in your publications and website Discoversouthcarolina.com must stop. Why would media like mine and many others pay state taxes that are used to compete with them. Discoversouthcarolina like chambers should be promoting media members and tax payers not competing . If the state and chambers pay no taxes why should I ? Again i assume your position is still anyone receiving tax dollars public or private should be forced to be open to Foia request .

Why would anyone think differently ? Without transparency and accountability in Government or private business among partners things don't work well.
