22nd Annual SC ENVIROTHON COMPETITION

April 20, 2018

CLEMSON
Sandhill Research and
Education Center

Letter from the Chair

Dear Participants,

On behalf of the Envirothon Steering Committee, I welcome each of you to the SC Envirothon Competition. While this event is competitive in nature, its primary mission is to promote and encourage environmental awareness and education. The Envirothon Program seeks to develop tomorrow's leaders, demonstrating the impact which humans have on the environment, whether it is negative or positive.

As a student, your participation in today's event is preparing you to take on a leadership role which will shape the future of natural resources and the health of our environment. You will be the innovators who encourage others to be good stewards of the land. Your dedication and desire to be a part of SC's Envirothon is a clear indication that you are poised to be a future leader, and you should be proud that you are here today. We are proud of your efforts, and pleased to be able to offer another year of the competition.

Whether you are a student, a coach, a sponsor, or a participating agency representative, you are helping to shape the future of our state by supporting conservation education in our schools.

Good luck to you all!
Kellee Melton
SC Envirothon Steering Committee Chair
