Seneca Rail Park – 320 Shiloh Road  
Seneca, South Carolina 29678**

**RSVP to Shelby Henderson at [shenderson@seneca.sc.us](mailto:shenderson@seneca.sc.us)**

The City of Seneca has successfully deployed Proterra all-electric transit buses as part of the Federal Transit Administration's Transit Investments for Greenhouse Gas and Energy Reduction (TIGGER) Program to become the nation's first city with an all-electric transit fleet.

The City of Seneca has successfully completed a redevelopment of the Seneca Rail Park as part of Federal Transit Administration's Livable Communities Initiative. The development includes maintenance facilities for Seneca's All-Electric Bus Service and provides room for future expansion for training and education opportunities.
