Lone Star Stabbing Case Gets Tips From iWatch

Harris County Sheriff Garcia Reports on CNN

(CNN) -- Dylan Quick overcame a childhood disability and had big plans for the future.

But on Tuesday, the 20-year-old student went on a stabbing spree on his Texas college campus, authorities said.

By the time campus police took him into custody, 14 people had been injured at Lone Star College. It's unclear how many of the injured were stabbed and how many suffered other injuries.

The campus shut down Tuesday, but will reopen Wednesday. Quick landed in jail. For now, his plans for the future may be in jeopardy.

IWatch Tip Leads To Bust At Grow Lab

(HOUSTON TX - June 26, 2013) -- A tip from an anonymous user of the iWatchHarrisCounty smart phone app led to the arrest Tuesday of two people in an investigation at a northwest Harris County house that was being used to stash...

Tips are received as email, voice or SMS but are also stored in iWatch.

Track tips by user, offense, reporting area and more.

Tips are mapped on Google maps, and displayed with the text of the report.

Reports received may be auto-responded or live response (ie: Dispatch or CID).

Tips are searchable based upon offense number, date range, keywords in text, suspect profile, vehicle, ip address or location.

Search multiple variable
(date, offense, keyword, UCR).

Search multiple variable
(date, offense, keyword, UCR).

The Dashboard can integrate to CAD to display offense, and can send tip content back to CAD for Dispatch

Share data as text, RSS, web video, email

Receive tips from email, online forms or SMS.

Unique identifier for tip receipt permits the tip to be associated with current offenses or with new tips not related to prior offenses

Tips may be text, voice, image or video.

Tips may be mapped by identifying the Geocode of the phone when sending the message.

Reports may be programmed for auto delivery to Command staff and may be in CSV, RSS or PDF formats.

Alerting Groups or Task Force Teams may be alerted automatically.

Complies with GJXML, NIEM and LEXS standards.

Alerts may include links to Crime Maps, which can generate crime tips..

Scalable to connect multiple jurisdictions, to share locally, regionally or statewide.

Citizens may sign up for alerts on the phone, and in email (reverse 911 system)

Platform based architecture meets local, state & federal legal & privacy mandates

The app integrates to Facebook and Youtube to display content and alert the public.
