Flipping the 80/20 Rule to Gain Agile Application Development

Because agencies typically spend 80 percent of IT budgets managing legacy systems and only 20 percent on new technology -- the more agencies can adopt agile application development methods, the faster they will increase efficiency and improve performance. Agility in software development requires keeping code simple, testing often and delivering functional bits of an application as soon as they are ready.

This special report takes a closer look at recent high-profile failures, along with intensifying regulatory scrutiny agencies face. Readers will gain tips, advice and insights from organizations working to modernize apps to make them more scalable and speedy -- and keep their operations out of news headlines.
