## South Carolina State Parks

at 20:00:11 on 3/31/2019 UTC · 🌐

Remember the gray seal who made stops at Myrtle Beach & Huntington Beach state Parks a few weeks ago? Here's an update on the little guy: <https://www.fisheries.noaa.gov/feature-story/all-hands-deck-wayward-gray-seal-pup>

### All Hands on Deck for a Wayward Gray Seal Pup | NOAA Fisheries

A young gray seal took an unexpected turn south this winter, visiting Hilton Head and Myrtle Beach and finally, St. Augustine, Florida. Gray seals in the Western Atlantic generally live in coastal areas from Canada to the northeastern United States. But every year, we encounter out-of-habitat seals.

FISHERIES.NOAA.GOV

**Donna Pangrazio Kwiatkowski** What about the small harbor seal who came ashore in MB around Christmas time? Has he been spotted again? I saw him on the beach at Kingston Plantation early January. He was adorable.
