**Brian, we are having some issues with internet connectivity at Edisto Beach State Park. When I look at the camera I see today's date, however, the video stops and starts, depending on the fluctuating internet connection. We do apologize. We have a technician who will be visiting the park this week and taking care of this. Once he arrives and replaces the equipment we should be back in business, until then, it's going to be hit or miss. The weather is still gorgeous in SC!**

Yes, Brian, we are currently having some technical difficulties with the webcam. We are working to get that live feed back up. Weather is beautiful in SC today!
