Subject: Tech college funding

Hi,

I cover higher education for the Independent Mail and have been curious for a while now about spending on tech colleges. Several of the campuses have long standing capital improvement needs and there's never much money for them to do much work.

The governor has been firmly against a bond bill, but is she open to find other ways for the state to get more financial resources to the tech schools? She, Bobby Hitt and everyone always say are how vital they are to the state's economic development efforts.

In short, where does the Governor stand on taking care of capital improvements for these schools?
