Subject: wish list

---

I would like to have a bigger podium at my greeter stand to allow us to fit our monitor and our ticket taker so we wouldn't have to turn our backs on the customers in order to serve them there, I would also like to have some way to give the people taking permit test a little privacy from the customers in the lobby, something that we can see through, so that we can still monitor them but that lets them test undisturbed by noise or talking.
