Subject: Save the Clamagore

I am E mailing you to ask your help in trying to save the submarine Clamagore, anchored at Patriots Point. It was scheduled to be made into an artificial reef in Florida. Thank God the friends of the Clamagore were able to stop that for now. There are several better options that would allow the sub to stay in SC and above ground. It deserves to be saved, it's part of SC history. Could you look into this and perhaps suggest anything that can be done or help the people that care for it do something to save it? If only it could be lifted above the water that continues to corrode it. Please, any thoughts? Thanks, Dalia
