Message:

I believe the Government of South Carolina is so concerned about protecting rights however this is how it appears: Your second ammendment rights are protected but we allow people to kill innocent people and support gun makers like they are on a pedestal (The Pope said, those that make weapons are not Christian). We lower taxes but we kill people with subs-standard roads. And we promote true HATE by continuing to fly the confederate flag. Enough - the people of Charleston should show you that they are people YOU should be protecting - in their churches, on the roads and in their own homes.
