Subject: Fix for the Social Security Fund.

Dear Gov. Haley,

I am actively pursuing an endeavor to finally shore up Social Security Retirement (SSR). Some politicians refuse to raise SS payroll tax, refuse to increase the income limit of \$118,500 (that only helps the wealthy), but send SSR checks to billionaires. Instead, they recommend extending the eligibility age, reducing or withholding Cost of Living Raises (COLA'S) and reducing Medical coverage (when people need it most, during old age).

All of their suggested options are ridiculous and it's the same ones they've repeated, like a broken record, for decades. If they can't think outside of the box then maybe they shouldn't get back into the election box. **We need results!** Not a bunch of political mumbo-jumbo that consistently favors the wealthy at the expense of the working class tax payer. Furthermore, many citizens will never become super-rich or high-achievers!

This nation's elderly were once the backbone of the tax paying working class, but when their bodies wore out, some politicians abandoned them like hot rocks to the poverty level. And then they look at us dumb-founded; unable to come up with a single workable remedy. Some thanks for all those years of being a good tax paying citizen.

My idea to save Social Security will work if we can just act on it. I've sent it to my South Carolina legislators and received a call from a staffer in one office. In your position, you can help me spread the word. We are all so tired of hearing politicians say, "There's nothing we can do, but raise the retirement age again". That's the wrong option. The Nation's elderly are not lazy, they are old, fragile and their bodies worn out now. Raising the retirement age again so they die before they are eligible is ridiculous. Please help spread this idea and let's get the nations elderly above the poverty level. I don't even need the credit for this idea, let's just make it happen.

"I recommend changing the Presidential Election Campaign box on the IRS Forms 1040, 1040A and 1040EZ to the Social Security Solvency box and donating the \$3/\$6 to Social Security. There's way to much money from special interest groups, lobbyists and Super PACS going to election campaigns these days to warrant having the Presidential Election Campaign box any longer. It doesn't need shoring up. "

If the "stubborn" politicians try to derail that then just Create a box right beside it asking taxpayers to contribute \$1 or more to the Social Security Fund when filling their taxes. If game playing politicians won't fix Social Security, "We the People will". Thank you.
