Subject: San Diego's massive IoT platform / New funding help / Stop struggling with data

[Click here](#) to view this message in a browser window.

San Diego will soon have the largest city IoT platform. See **how it's doing it**. There's new **help to get the funding** you need. **This robot helps** the elderly age with dignity. Make better **sense of your data**. And don't miss **Smart Cities Week Silicon Valley**.

Now you're caught up,
Jesse Berst

Meet San Diego's new IoT platform (and build your own). San Diego will soon have the world's largest city IoT platform — and it's doing that by leveraging its investment in smart street lights. Find out how and why you may want to do the same.

Need help finding the smart city project money you need? The sustainability and livability benefits of smart cities are attracting the interest of more and more city leaders. But money is often the big roadblock. Read on to learn how you could get around it.

Future of eldercare? A Watson-powered robot that helps Mom and Pop age in place. With the 60-plus crowd one of the world's fast growing demographics, helping them live more independent lives as they age is the impetus for an IBM eldercare robot assistant developed in collaboration with Rice University. Click for details and a short video.

6 ways augmented reality can help you see clearly. Struggling to make sense of your data? Augmented reality has been making a big difference for travel and tourism, but it may be time to consider it for even more in your city.
