Gov. Haley:

I grew up in Northern Virginia and went to high school in Woodbridge. A key educational goal is critical thinking. This involves looking at assumptions and considering alternative viewpoints.

Rick Perry, Ben Carson & Marco Rubio all confronted the age of the earth controversy. My shockingly bold new book provides the answer – based on history, philosophy, geology and biology.

My book provides a significant motivation for the School Choice movement. Should we waste \$B's on funding research based on Old Earth Fallacies (OEF's)? I also deal with bullying in Ch. 7.

I would be happy to speak with a group of any size on the topic of my book. Remember *2012* (Emmerich); remember *Japan Sinks* (2006)!

Yours in the Journey,

Jay Hall M.S. (Math, 53 hrs. Science)
