Transform Your Network Now, So Your Network is Ready for Tomorrow

Now's the time to prepare for future Cloud and IoT demands

Dear Nikki,

In 2016, a large cabinet-level government agency quietly achieved a major 'first' in government networking technology. They procured a **managed broadband solution that will cut costs AND add mission-critical bandwidth** to their distributed offices.

Hughes, partnering with Level 3 Communications on the Networx Enterprise Contract, is delivering that revolutionary solution to hundreds of sites nationwide. The implementation will ready this particular agency for the tsunami of connected devices and the growing number of Cloud-based applications on the horizon.

HughesON™ Managed Broadband delivers. . .

- High speeds to ALL sites nationwide – even rural and remote locations
- Wireless PCI Intrusion, Detection, and Protection services

- State-of-the-art encryption technology
- Extensive managed firewall services
- Centralized network architecture to reduce security threats

Tomorrow's almost here, so start preparing for your network's future TODAY!

Call us at 844-817-5290 or let us know how our representative can [contact you](#).

All that protection from one small device?
