Comments:

Tried Twice to see you or get  
 Appointment. Came in person to  
 Ask but never heard a word.

Why!!

Please let's create in  
 S.C. for our Citizens

Mrs. Molly Spearman,

Congratulations on your win last night. I would love to sit down and talk to you about the billions that could be made off hemp promotion in South Carolina. Yes! We got the law passed last year and Senator Shealy voted for Hemp.....Yes! Mrs. Shealy had cut me off facebook for trying to educate Citizens but learned anyway.

I can bring 2 Billion Dollars to S.C. in agriculture and manufacturing within 2 years of planting. We could make all products in our schools poison and chemical free while preserving Environmental balance with nature. I have a hemp plastic house that would generate it's own electricity. Hemp for Mother Earth is all about Common Sense, Insight, Imagination, and Ingenuity & Integrity Too.

New ways of doing things that were foiled by DuPont, Hearst, Rockefeller, Dow & Monsanto in 1937 by turning God's most useful plant into Marijuana. All products from Hemp will leave no carbon footprint and is bio degradable. Colorado schools get \$290,000.00 dollars off every Million in Sales of legal Marijuana for their schools. Legal Marijuana does not hold a candle to the Billions off hemp. Henryford1941hempcar.com is a great read and all cars will be

hemp in the future: batteries, carpet, wood, cloth, plastic (hemp plastic is 10 times stronger than steel) and cardboard. We as citizens deserve education into this plant to see the 50,000 new jobs and small businesses created for our Citizens.

If you'll want to fix schools and learning don't let major Corporation control what our Citizens can do within our STATE. It's time to take our STATE back to homegrown and manufactured productions that create jobs for our Citizens. This could all be achieved with Grants from Government to start a Nationwide educational revolution for Hemp to be leader in housing, medical, cars, farms, wood, plywood and medical for animals.

I've written to Government Haley since 2008 about using hemp to produce car parts for the 13 car manufacturers within 600 mile radius of S.C.. I also wrote Roger Goodell (NFL Commissioner) about using Roche in Florence as research for marijuana use on football injuries. Roger did not respond but three weeks after receiving my letter; NFL gave 16 \$300,000.00 dollar Grants to study marijuana on football injuries. The Post traumatic stress the Government gave U. of Arizona a Grant to study and getting their marijuana from Ole Miss. Yes! I wrote them too trying to get them to use closed Roche Factory in Florence. Governor Haley refused to help injured service personnel with small farms of 100 acres of better for rehabilitation and growth of military personnel retirement in our STATE. Let's work together to educate our Citizens while creating new and invigorating jobs for our Children in the future.

Lt. Governor, Yancy McGill, has close plywood factory that we could make hemp wallboard that will not mold or mildew and is stronger than regular plywood. Check with Fire Marshall, Hemp will not put off poisons and chemicals that get in lungs like everyday used products.....Hemp for Mother Earth needs to sit down and discuss possibilities of positive effects on our Environment and STATE without Political Parties; just S.C. Citizen's ways of showing the world that we can make a difference and change.....

Thank you for your time.....Sincerely

Ricky Loftin
