SERIOUS BUSINESS - We can't let big companies contaminate our waterways...! Here is my petition: (<http://petitions.moveon.org/sign/no-balling-allowed-save>) I grew up on Saint Helena, Island, SC eating fresh oysters, crabs, couch, and a all kinds of fish... Our familes and friends lives off of the seafood there.. The industry is at its best right now! Boiled crabs, shrimps and fish fry's are everyone's favorites. I also love bringing these fresh lower cost seafood back to Virginia when I visit St. Helena Island, SC (HOME). There is always some seafood in my deep freezer. Fishermen, oystermen, shrimpers and crabbers will suffer economically once the water are contaminated. Our personal health will also be at risk of cancer and other health concerns. If you love FRESH seafood, you should support this petition! Please click here to sign: (<http://petitions.moveon.org/sign/no-balling-allowed-save>) Thank you
