Donald Trump's rise should be a lesson to you and all "die hard" Republicans. The voter may not understand why they like Trump, but it's because they are sick of decades of the same old craziness. You are repeating the "out of date " Republican thinking. You and the out of date Republican Party need to get your crap together and understand that it's time to see reality. Voters want change, but they're not ready to call themselves Democrats. You need to wake up and see reality while you have a Republican Party. When we hear you or other commentators, we think WTF is going on. Wake up and smell the crap that is the Republican Party that you know.
