Dear Governor,

I, like many Americans, ~~am~~ disturbed over the Islamic refugee resettlement throughout America. It seems to be engineered by the UN, with little to no input from local governments. At our Spartanburg county council meeting recently our council members were strangely mute on the subject. Even the usual dissenters were silent. Muslims want to overrun our nation, as they infiltrated others, bringing with them their hate for all things American, refusing to assimilate into our society, infusing their violent Sharia law, which totally opposes our Constitution. With the huge flood of them, there is no way to vet them all. A large proportion is young males, way more than women & children. God knows how much disease they bring with them. As usual American taxpayers will foot the bill. God alone also knows how many terrorists we will be inviting into our nation. Why is it everyday Americans have no say in such a crucial matter?
