Subject: Join Us on LinkedIn

The POWER magazine LinkedIn Group is a forum for the global power generation community. It's a place to:

- Learn what's new at POWER—from must-read technical articles to industry news to events we sponsor and speak at.
- Share information (but no marketing, please).
- Ask for advice, using the Conversations tab.
- Network with peers around the globe through Discussions or InMail.
- Post and look for jobs (using the Jobs tab).
- Help advance the safe, smart, and savvy development and operation of power generating facilities of all types and sizes.

BECOME A MEMBER

Join us today to discover what others in the industry are saying about:

Do you think safety is sacrificed when initiatives, such as a "100-day dash," are instituted? Workplace accidents, like the scaffold collapse in China, should encourage all workers to review job activities and focus on improving safety practices.

Is your plant connected? Next-generation digital technologies are already reshaping the power industry, far beyond the capabilities of now-standard distributed control systems. Do you understand the options and what's at stake?

How risky are you while navigating the changes in personnel at the power plant? Many power generating facilities have yet to think about what happens when their employees retire. Are you keeping up with the changing work place?

Is Crescent Dunes' technology a game-changer for the concentrating solar power industry? The plant's molten salt thermal energy storage system allows the plant to operate around the clock.

Since 1882, POWER magazine (www.powermag.com) has covered "Business and Technology for the Global Generation Industry." This globally distributed trade publication for power generators of all technologies now also includes the digital publications POWERnews (www.powermag.com/POWERnews/signup.html), COAL POWER (www.coalpowermag.com/), GAS POWER (on.powermag.com), and MANAGING POWER (www.managingpowermag.com/)
