## A Culture of Health. A Year of Progress.

Over the past year, we've been energized and inspired by the many ways that people across America are working together to build a Culture of Health.

This year, six outstanding communities were awarded the RWJF Culture of Health Prize for making the well-being of their residents everybody's goal. In places like the award-winning city of Brownsville, Texas, families, health professionals, educators and community leaders have teamed up to help everyone live the healthiest lives they can.

With passion and purpose, we can all build a healthier America.

[See how Brownsville is  
bringing people together to  
achieve better health.](#)

May the New Year bring greater health and more happiness to you  
and your family.

Warmly,

and the RWJF Board of Trustees and staff
