Can they improve the resolution at all? 1st one looks better, 'cause the dots will be bigger and more visible. We need a label on it so that folks see that it's "XXX Load Restricted Bridges" (need the actual number. Would also be better if we could remove the random bold print (Irmo three times). Definitely the right track, though. Thanks.

Haven't looked at these yet but let me know if you like them and want them blown up. Not sure that we can print but will try.

Wendy:

Attached is a PDF with 2 maps of the same data but with different size dots. You can use the one you think looks better. If you have any questions please let me know.
