## South Carolina State Parks

at 19:00:01 on 6/03/2019 UTC · 🌐

Ever wonder how we keep our Animal Forest animals at Charles Towne Landing cool during extreme heat? Our zookeepers work hard at it. In addition to having access to shade and fresh water, the animals are provided cooling misting systems, ice piles, fans, sprinklers and even homemade popsicles made with their favorite foods, like the deer's "corn-pops" you see here. And why not a giant ice cube to cool off for the bear? Just a few ways we keep our animals cool & happy at Charles Towne Landing!

**Renee Mathis Swann** ❤️❤️❤️❤️

**David Pollock** How do you make the corn pop?

at 23:14:37 on 6/04/2019 UTC

**Mark Price** This is so cute

at 9:54:53 on 6/05/2019 UTC

**South Carolina State Parks** It's just deer corn and water frozen! Easy peasy!
