Dr James Clements President
Clemson University - Sikes Hall
Clemson, SC 29634

Dec 28, 2016

Dear Dr. Clements:

Pardon this hand written memo, my new computer is in transit from CA.

Since early of Oct this year I have sent letters indicating my intent to return to SC and hopes to cooperate with Clemson in tech areas of common agricultural and engineering interest prior to a DSM decision point to commit R&D efforts here near Kingstree plant.

During this period high impact patents have been examined & work begun on a novel propulsion system at GM as well as a second patent diversifying their global market domestic energy systems from Exxon Mobil renewable and net CO₂ fuels as they are also firmly hooked with 3 key solar/wind patents

To date I have had no feed back from you or Governor Haley regarding proposals for work beginning in 2017.

In the short term my funds are meager
those not in the long term.

If you plan to offer me employment
would you kindly do so rather soon as I
don't relish being in the dark or in
limbo re Clemson employment beyond
first of January

Respectfully

Tom Yung PhD
