#### Description/Significant Features:

The original portion of the 1-story concrete-block dwelling is one-story tall, four-bays wide, and two-bays deep. It is rectangular in plan, clad in stucco, and capped by a side-gable roof of asphalt shingles. A brick chimney pierces the gable ridge. A one-story porch runs three-quarters of the length of the south-facing façade. The porch is capped by a gabled roof and supported by square, concrete block piers. Five pairs of original, wood, six-over-two double-hung windows are located on the dwelling's façade and east elevation. A single front door is centered under the porch roof. Windows on the addition appear to be aluminum, one-over-one, double-hung windows in various sizes.

Alterations (include date(s), if known):

A large, concrete block addition was constructed on the west elevation ca. 1960. It is one-story in height and rectangular in plan. It is clad in stucco and capped by a side-gable roof of asphalt shingles. Part of the addition is a screened-in porch that features a screen door. Two, one-story non-historic pole barns are located NE of the dwelling; A one-story, non-historic garage is located N; A two-story, frame barn covered in corrugated metal is located NW.
