Subject: Roger Dale Bradley ~ Website email from Donna Foster

---

Roger is a client of Union Co. DSN. He is a 63 yr old deaf male which has been a client with the agency for 20 + yrs. I am Roger's sister and his only voice. My husband and I have experienced many problems over the years with UCDSN. It has been a battle for us to get communication for Roger and finally got USC Speech and Hearing to evaluate Roger. My husband and I had to do this own our on by changing case management. The Arc has been some help with getting some sign language with writing but DSN staff may not be able to learn this to help Roger. Roger went to SC School for the Deaf and Blind until he was age 15 or so and does well with fingerspelling and some signs, and also writes well but only comprehends short sentences. My other great concerns are DSN not following Doctor Orders. Roger's medicine running out before he receives full dose, labels are incorrect on medicines and losing weight and eating food too fast and etc. We have contacted Protection and Advocacy, Harvey Peeler's office, State Residential Director. All were going to get this under control but now its back to a dead end. I have asked for Board Members info.....no avail so I would really like to meet with someone who can look beyond paperwork and see the real issues. Please contact me if you have the correct solutions in what is needed for my brother to live happy and the other clients here in Union co. also. I saw DDSN issues on the News Media and my thoughts were maybe its time to speak up about UCDSN to you.
