

# Cultural Resources Project Screening Form

File Number:  PIN:  Route:  County:

Project Name:

Type 1: Resurfacing, installation of fencing, signs, pavement markings, traffic signals, passenger shelters, railroad warning devices, installation of rumble strips, and landscaping

Project Type

Type 2: Bridge replacements on alignment, construction of bicycle/pedestrian facilities, and intersection improvements

Type 3: Projects that do not fall into Type 1 and Type 2 categories (e.g. road widening)

## Comments

This project involves the construction of sidewalks in Aiken County for the Safe Routes to School Project. The proposed sidewalks will run from Aldrich Street and Croft Avenue and both lead to North Aiken Elementary School. The sidewalks are approximately 125 and 140 meters in length. The area of potential effect (APE) was reviewed using ArchSite, Google Earth, and historic imagery. The review determined that no previously recorded cultural resources are recorded within or in the vicinity of the APE. A field visit was made on January 7, 2020. A total of six shovel tests were excavated. Five shovel test locations were investigated but not excavated due to heavy ground disturbance. No artifacts were identified during the survey. Four new historic resources were identified (Site Nos 3521-3524). All four resources were ranch style residential structures constructed in 1952. None of them are recommended eligible for the National Register of Historic Places. No additional cultural resources investigations are recommended. No historic properties will be affected by this project.

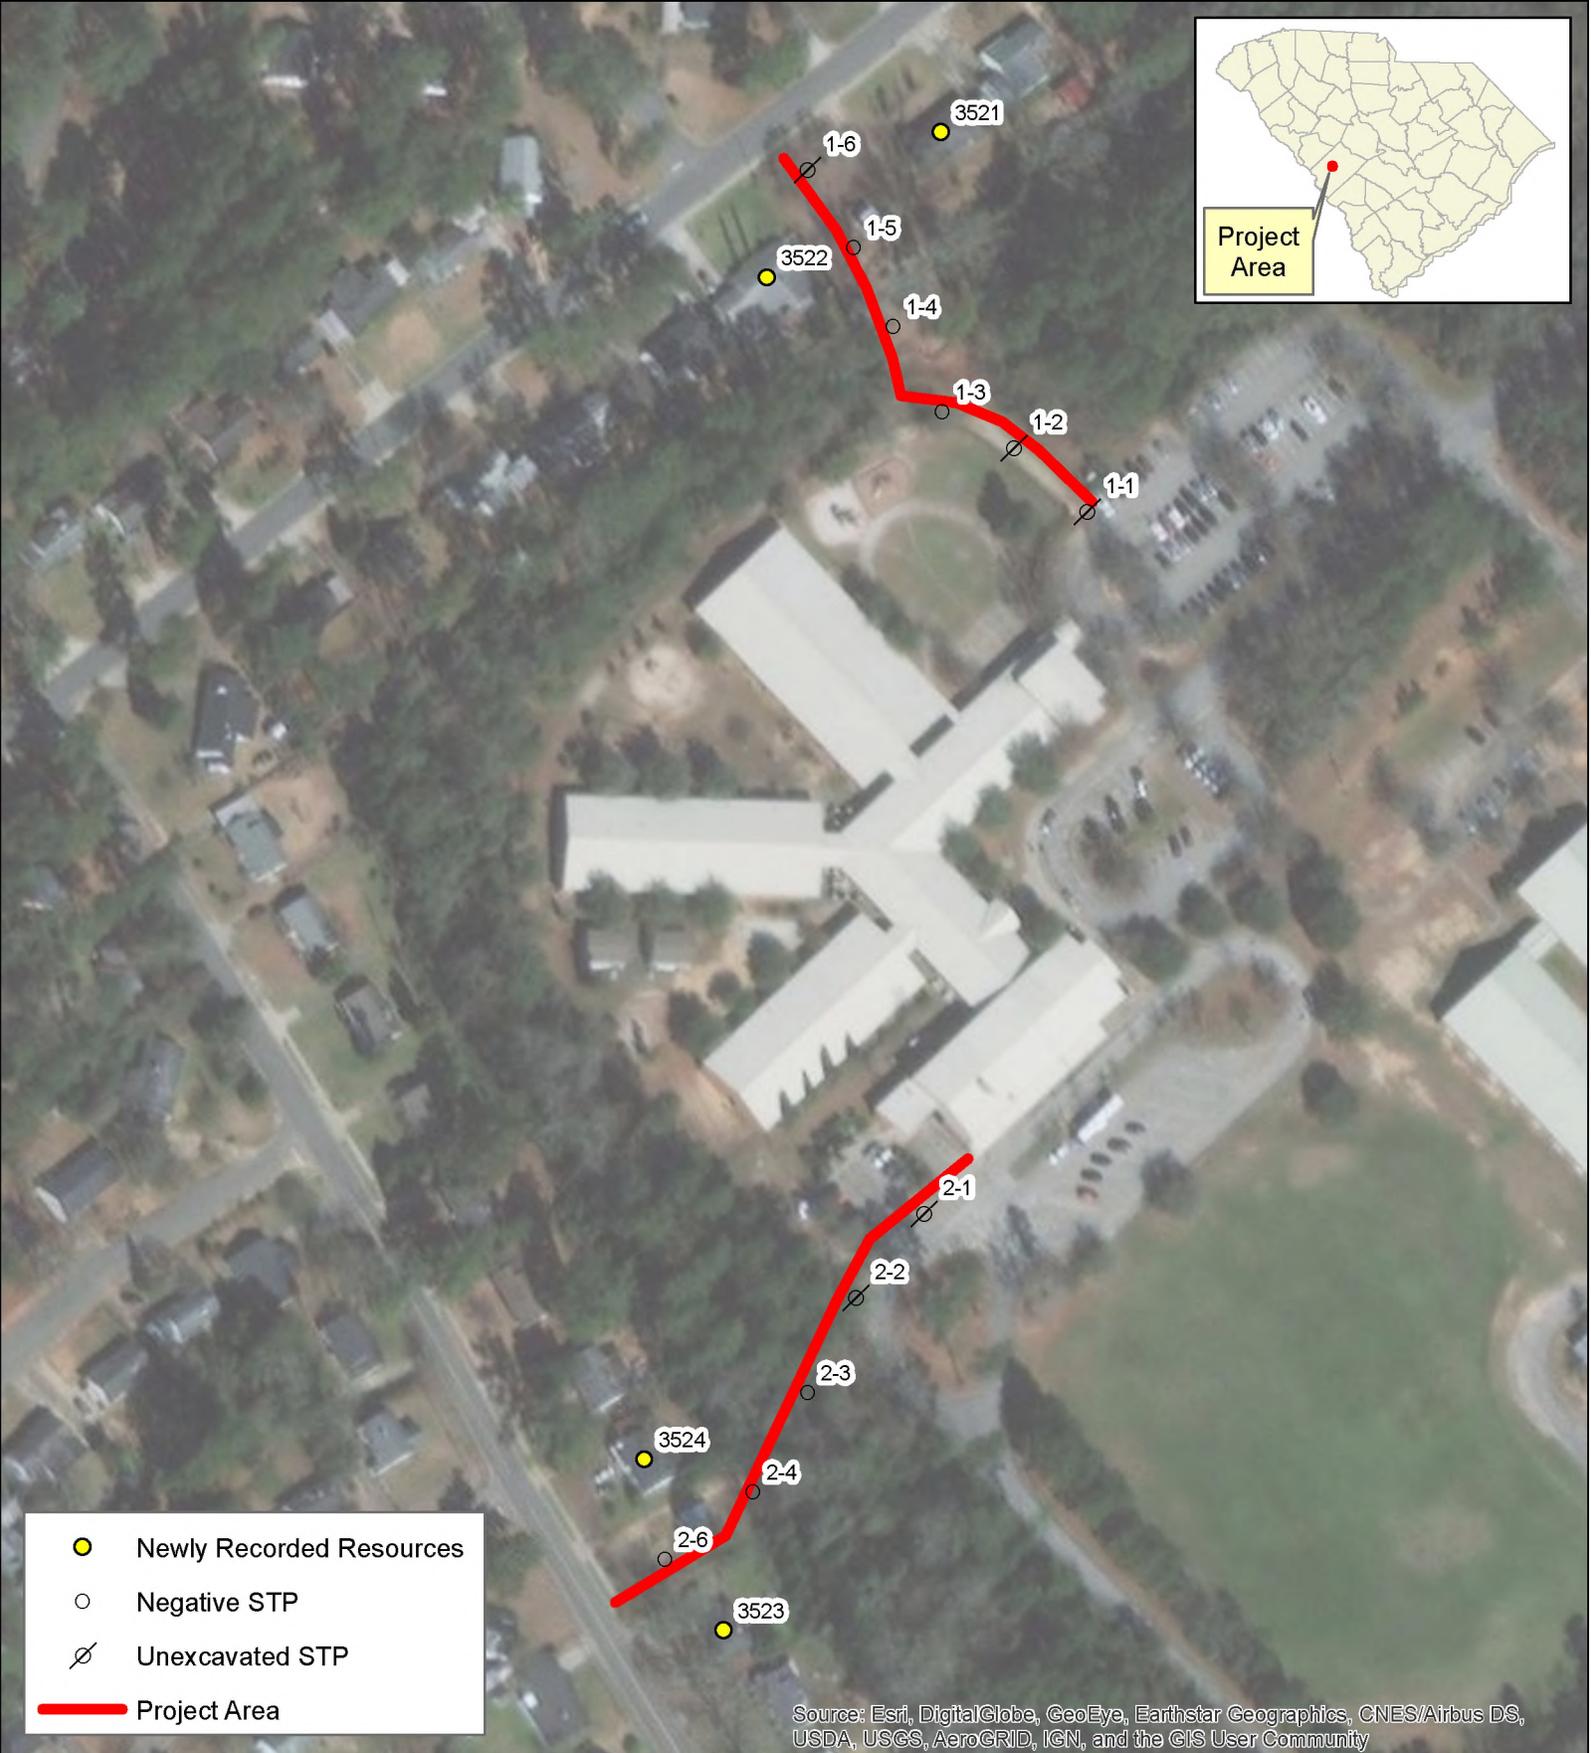

Effect Determination:

\*SHPO consultation is required for all Type 3 projects and any project with a No Adverse or Adverse Effect Determination.

This screening form was developed to satisfy documentation requirements for Type I and Type II projects under a Programmatic Agreement between the Federal Highway Administration, the South Carolina State Historic Preservation Office, the US Army Corps of Engineers, and the South Carolina Department of Transportation. For Type I and Type II projects that have no effect on historic properties, the completion of this screening form with supporting documentation (e.g. ArchSite Map) provides evidence of FHWA and SCDOT's compliance with Section 106 of the National Historic Preservation Act.
