

Cultural Resources Project Screening Form

File Number: PIN: Route: County:

Project Name:

Type 1: Resurfacing, installation of fencing, signs, pavement markings, traffic signals, passenger shelters, railroad warning devices, installation of rumble strips, and landscaping

Project Type

Type 2: Bridge replacements on alignment, construction of bicycle/pedestrian facilities, and intersection improvements

Type 3: Projects that do not fall into Type 1 and Type 2 categories (e.g. road widening)

Comments

This project consists of purchasing five residential parcels in Charleston County in order to build housing that will be used to relocate individuals displaced by the widening of I-526. Parcel 1 (4721200056) is located at the intersection of Lakewood St. and Railroad Ave. and is 0.92 acres in size. The Area of Potential Effect (APE) was reviewed using ArchSite, Google Earth, historic maps, the SCDOT plans library, and the USDA Web Soil Survey. The review indicated that no previously identified cultural resources are located within or in the vicinity of the APE. Historic aerials indicate that this parcel was wooded until at least 1968 and has housed multiple mobile homes since at least 1971. A cultural resources survey of the APE, which consisted of shovel testing and surface inspection, was conducted on 1/15/2020. A portion of the parcel was paved and did not require testing. A total of four STPs were excavated, which indicated disturbed soils. One cultural resource was recorded, Site No. 8033, a residential structure dating to 1958. It is not eligible for the NRHP. No other cultural resources were found during the survey. No additional cultural resources investigations are recommended. No historic properties will be affected by this project.

Effect Determination:

*SHPO consultation is required for all Type 3 projects and any project with a No Adverse or Adverse Effect Determination.

This screening form was developed to satisfy documentation requirements for Type I and Type II projects under a Programmatic Agreement between the Federal Highway Administration, the South Carolina State Historic Preservation Office, the US Army Corps of Engineers, and the South Carolina Department of Transportation. For Type I and Type II projects that have no effect on historic properties, the completion of this screening form with supporting documentation (e.g. ArchSite Map) provides evidence of FHWA and SCDOT's compliance with Section 106 of the National Historic Preservation Act.

Comments

This project consists of purchasing five residential parcels in Charleston County in order to build housing that will be used to relocate individuals displaced by the widening of I-526. Parcel 2 (4721200047) is located on the north side of Kerry St. and is 0.34 acres in size. The Area of Potential Effect (APE) was reviewed using ArchSite, Google Earth, historic maps, the SCDOT plans library, and the USDA Web Soil Survey. The review indicated that no previously identified cultural resources are located within or in the vicinity of the APE. Although, now an empty lot, historic aerials indicate that his parcel once contained a mobile home. A cultural resources survey of the APE, which consisted of shovel testing and surface inspection, was conducted on 1/15/2020. A total of two STPs were excavated, which indicated disturbed soils. Four cultural resources were recorded, Site No. 8034, 8037, 8038, and 8039, all of which were residential structures dating from 1955 to 1970. None are eligible for the NRHP. No other cultural resources were found during the survey. No additional cultural resources investigations are recommended. No historic properties will be affected by this project.

Effect Determination:

*SHPO consultation is required for all Type 3 projects and any project with a No Adverse or Adverse Effect Determination.

Comments

This project consists of purchasing five residential parcels in Charleston County in order to build housing that will be used to relocate individuals displaced by the widening of I-526. Parcel 3 (4721200046) is located on the north side of Kerry St. and is 0.11 acres in size. The Area of Potential Effect (APE) was reviewed using ArchSite, Google Earth, historic maps, the SCDOT plans library, and the USDA Web Soil Survey. The review indicated that no previously identified cultural resources are located within or in the vicinity of the APE. Although, now an empty lot, historic aerials indicate that his parcel once contained a mobile home. A cultural resources survey of the APE, which consisted of shovel testing and surface inspection, was conducted on 1/15/2020. The entirety of the parcel was disturbed from gravel or pavement and it was not shovel tested. Two cultural resources were recorded, Site No. 8035 and 8036, both of which were residential structures dating from 1950 to 1955. Neither are eligible for the NRHP. No other cultural resources were found during the survey. No additional cultural resources investigations are recommended. No historic properties will be affected by this project.

Effect Determination:

*SHPO consultation is required for all Type 3 projects and any project with a No Adverse or Adverse Effect Determination.

This screening form was developed to satisfy documentation requirements for Type I and Type II projects under a Programmatic Agreement between the Federal Highway Administration, the South Carolina State Historic Preservation Office, the US Army Corps of Engineers, and the South Carolina Department of Transportation. Comments

This project consists of purchasing five residential parcels in Charleston County in order to build housing that will be used to relocate individuals displaced by the widening of I-526. Parcel 4 (4721200033) is located at the intersection of Piedmont Ave. and Kerry St. and is 0.17 acres in size. The Area of Potential Effect (APE) was reviewed using ArchSite, Google Earth, historic maps, the SCDOT plans library, and the USDA Web Soil Survey. The review indicated that no previously identified cultural resources are located within or in the vicinity of the APE. Historic aerials indicate that this parcel was wooded until at least 1968 and has housed multiple mobile homes since at least 1971. A cultural resources survey of the APE, which consisted of shovel testing and surface inspection, was conducted on 1/15/2020. Two shovel tests were excavated, which indicated disturbed soils. One cultural resource was recorded, Site No. 8040, a residential structure dating to 1952. It is not eligible for the NRHP. No other cultural resources were found during the survey. No additional cultural resources investigations are recommended. No historic properties will be affected by this project.

Effect Determination:

*SHPO consultation is required for all Type 3 projects and any project with a No Adverse or Adverse Effect Determination.

This screening form was developed to satisfy documentation requirements for Type I and Type II projects under a Programmatic Agreement between the Federal Highway Administration, the South Carolina State Historic Preservation Office, the US Army Corps of Engineers, and the South Carolina Department of Transportation. Comments

This project consists of purchasing five residential parcels in Charleston County in order to build housing that will be used to relocate individuals displaced by the widening of I-526. Parcel 5 (4721200032) is located on the eastern side of Piedmont Ave. and is 0.31 acres in size. The Area of Potential Effect (APE) was reviewed using ArchSite, Google Earth, historic maps, the SCDOT plans library, and the USDA Web Soil Survey. The review indicated that no previously identified cultural resources are located within or in the vicinity of the APE. Historic aerials indicate that his parcel was wooded until at least 1968 and has housed multiple mobile homes since at least 1971. A cultural resources survey of the APE, which consisted of shovel testing and surface inspection, was conducted on 1/15/2020. Two shovel tests were excavated, which indicated disturbed soils. Two cultural resources were recorded, Site No. 8041 and 8041.01, a residential structure dating to 1962 and associated outbuilding dating to 1970. Neither is eligible for the NRHP. No other cultural resources were found during the survey. No additional cultural resources investigations are recommended. No historic properties will be affected by this project.

Effect Determination:

*SHPO consultation is required for all Type 3 projects and any project with a No Adverse or Adverse Effect Determination.

This screening form was developed to satisfy documentation requirements for Type I and Type II projects under a Programmatic Agreement between the Federal Highway Administration, the South Carolina State Historic Preservation Office, the US Army Corps of Engineers, and the South Carolina Department of Transportation. For Type I and Type II projects that have no effect on historic properties, the completion of this screening form with supporting documentation (e.g. ArchSite Map) provides evidence of FHWA and SCDOT's compliance with Section 106 of the National Historic Preservation Act.
