Subject: Lobbyists and Special Interest Groups ~ Website email from Rivers Cole

---

Lt. Governor Bryant, Thank you for taking the time out of your busy schedule to read this letter. Our country is in dire need of legislators who will vote the "will of the people." This is how our current president won the election. He spoke to the 'people' and won their trust. Please do not let these special interest groups decide the future of our country as was the case with what happened last night in the decision to 'shut down' the government. The people are smarter than that and I would have thought our elected legislators were too but I was proven wrong. As a citizen I am appalled that the interests of our nation's immigrants' children has come before funding our own military and civil servants. Please do not be fooled and wake up to the desires of the 'people' you serve not your personal financial future. Janet M. Cole
