Subject: Lt. Governor

Tony, a Senator has called the Lt. Governor with a question from a constituent. The constituent spoke with someone at their local COG, checking on any home health services for a 93 year old mother with very little income, who wants to stay in her home as long as possible. They said that the new program, which started in July, would award \$550 per year for a qualified senior. First of all, he wants to know if that is a correct representation of that program, as well as more details from you as to how many seniors that would serve, etc. In addition, is there any other program that she might qualify for (other than maybe home delivered meals)? Thanks.
