For Commission Meeting of: October 16, 2008

____ **RATIFICATION**

____ **CERTIFICATION**

____ **FOR INFORMATION ONLY**

____ **CUFF ITEM FOR APPROVAL**

DETAILED DESCRIPTION:

Request Commission approval of the additions, deletions and corrections to the State Highway System as shown on the attached pages. This request includes 21 segments of the secondary road system resulting in a reduction to the secondary of 2.03 miles.

Recommended By: Richard B. West — Director of Traffic Engineering — 9-26-08 Date

Division Director Approval: KBE for SCW — Deputy Secretary for Engineering — 10/1/08 Date

Secretary Approval: HB Genie Lowe — 10/13/08 Date

Removal of Roads From State Highway Secondary System

The Department recommends Commission approval for the removal of certain sections of secondary roads from the State Highway Secondary System. These sections of roads may be removed for one of the following reasons:

1. Abandonment of Relocated Section of Highway

2. Deletions and Removal of Roads from State Secondary System - Roads may be deleted and removed from secondary system by exchanging for equal or less mileage or roads, which have a higher traffic importance. Ownership reverts to local government having jurisdiction (city or county). Approval of deletion or removal by local government is not required.

3. Abandonment of Right-of-way - Right-of-way may be abandoned if it is determined that the right-of-way is not required for right-of-way proposes or if the right-of-way is not needed for Department purposes.

4. Court Order

Correction of Description of State Highways

The Department recommends Commission approval of the correction of the description of sections of State Highway previously added to the State Highway System. The description of roads currently in the State Highway Secondary System may be changed for relocation purposes, to revise the description of the termini to show what was actually constructed by contract, county line changes, or a change in the secondary road number.

Additions to State Highway Secondary System

The Department recommends Commission approval to add sections of road to the State Highway Secondary System for construction and maintenance. The Department may add roads to the State Highway Secondary System by request of the County Transportation Committees contingent on mileage being available under the current mileage cap. Roads may be added to the State Secondary System by the construction of a new roadway, accepting existing county/city roads into our Secondary System by the swap method, or by county line changes. Roads added to the State Highway System must be constructed to Department standards or reviewed for compliance with Department standards.

Rescind Action Adding Roads to State Highway Secondary System

The Department recommends the Commission rescind its previous actions adding roads to the State Highway Secondary System for construction and maintenance. The Department may rescind action on roads, which have not been constructed and formally accepted into the State Highway Secondary System. Roads may be rescinded due to right-of-way being unavailable, problems arising during construction, or funding issues.

Transfer of Road between Secondary and Primary Systems

The Department recommends Commission approval to transfer sections of road from the Secondary System to the Primary System, or vice versa. Pursuant to the provisions of Section 57-5-50 of the Code-of-Laws of South Carolina, 1976, the Commission may transfer any route or section of route from the state highway secondary system to the state highway primary system, or vice versa, when, in its judgment, such transfer is advisable to better serve the traveling public.

1. File 24.567 - US Route 221 - Greenwood County – Third District

During construction of improvements on US Route 221 under File 24.567 near the City of Greenwood, in Greenwood County, the Department acquired Right of Way for Bryant Road relocation from Silas T. Moore by Title to Real Estate dated August 3, 1993.

A request was made by the adjacent landowner for a portion of the abandoned portion of Bryant Road relocation created under File 24.567. The request was circulated to the engineering sections to determine if said parcel could be declared surplus. After review, it was determined that the parcel was surplus to Department needs. Therefore, a Quitclaim Deed conveying approximately 0.63 of an acre of land to Robert E. Bryant and Yvonne R. Bryant was executed on August 19, 2008.

The Commission approved the sale of this parcel on February 21, 2008.

2. File 14.119B/21.132B/45.678 – US Route 378 - Florence County - Sixth District

During construction of improvements on Road S-585, under File 45.464, near the Town of Olanta, in Williamsburg County, the Department acquired right of way for Road S-585 from H.C. Gowdy by Right of Way Easement dated January 27, 1975 and from Ethel Bennett and H.C. Gowdy by Right of Way Easement dated January 28, 1975.

The Department is currently involved in a Condemnation action with the landowner, Gowdy, claiming he should be paid for the building as a part of the current acquisition based on his interpretation of the 1975 Right of Way Easement. The current construction project has been completed and Spring Road (Road S-585) was relocated away from the building creating the ability to relinquish 0.05 of an acre to David Llwellyn Gowdy to dispute his claim at trial. David Llewellyn Gowdy is the son of H.C. Gowdy. Therefore, a gratis Quitclaim Deed conveying approximately 0.05 of an acre to David Llewellyn Gowdy was executed on August 21, 2008.

The Commission approved the sale of this parcel on August 21, 2008.

3. File 9.454 – US Routes 601 & 176 – Calhoun County - Sixth District

During construction of improvements on US Route 601, under Project 728-C near the Town of St. Matthews in Calhoun County, the Department acquired right of way for US Route 601 by Deed to Right of Way from W. N. Gressette, J. T. Gressette, and F. R. Gressette dated June 23, 1931. Also, during construction of improvements on US Route 176, under Project 356-B, the Department acquired right of way for US Route 176 by Deed to Right of Way from J. T. Gressette,William N. Gressette, and Furman R. Gressette dated December 28, 1934.

A request was received from the adjacent landowner asking the Department for the abandoned roadbed of US Route 601/176 created by the relocation of US Route 601. The request was circulated to the engineering sections to determine if said parcel could be declared surplus. After review, it was determined that the parcel was surplus to the Department needs. Therefore, a gratis Quitclaim Deed conveying approximately 0.24 of an acre of land to F. Reeves Gressette, Jr. was executed on August 25, 2008.

The Commission approved the sale of this parcel on July 17, 2008.

4. File 23.537.1 – Road S-326 - Greenville County – Third District

During construction of improvements on Road S-326 under File Number 23.537.1 in Greenville County, near the City of Greenville, the Department acquired Right of Way for Road S-326 from Nylon Industries, Inc. by Right of Way Easement dated September 29, 1964.

A Petition to close a portion of abandoned frontage road was filed by Carolina First Bank on February 25, 2008 in the Office of the Clerk of Court for Greenville County. An Order was issued on July 8, 2008. Therefore a Quitclaim Deed conveying approximately 1.3 acres of land to Carolina First Bank, a subsidiary of The South Financial Group, Inc. was executed on September 8, 2008 in consideration of $150,000.00.

This is for a commitment made prior to June 27, 2007.

Memorandum

HCR-0008-L490-0099

Subject: **ACTION:** Approved Funding for South Carolina Department of Transportation (SCDOT) On-the-Job Training Supportive Services (OJT/SS) Program

Date: AUG 2 5 2008

From: Thomas J. Smith
Thomas J. Smith
Acting Associate Administrator for Civil Rights

In Reply Refer To: HCR-20

To: Robert Lee
Division Administrator (HDA-SC)

This memorandum is to advise that the SCDOT project, *School to Work Transitional Program*, submitted for funding is approved under the OJT/SS Program for Fiscal Year (FY) 2008. **A total of $90,000 is approved for this project.** The funds will be used to provide high school and college students employment opportunities in the transportation industry.
Please be advised that a four-member panel of the Federal Highway Administration (FHWA) Division Offices and State Transportation Agencies civil rights representatives was convened to rate and rank the statements of work (SOWs) on August 4-6, 2008. In its review, four major factors were considered: (1) performance results; (2) in-kind (3) effective use of partnerships; and (4) budget.

The annual call for proposed national model initiatives under the FHWA OJT/SS program continues to far exceed the available funding. Seventeen States submitted SOWs for 31 projects. Of the $12,000,000 requested, the FHWA Headquarters Office of Civil Rights (HCR) had less than $5,000,000 available for funding.

The approval is based on the following understanding:

> Prior to the end of FY 2008, these funds should be obligated under FHWA program **code L490**. The Federal share is 100 percent. By copy of this memorandum, we are requesting that the Chief Financial Officer record the allocation of **$90,000** with an equal amount of obligation authority into the Fiscal Management Information System (FMIS).

In addition to the items addressed above, the South Carolina Division Office will continue its oversight responsibility which includes: (1) forwarding a revised work plan

1	351463	CHARLESTON	Curb Cuts	LEROY GARDNER	N	N	SC	162	SC-162	NEED TO LOOK AT PLANS WITH RICHARD TURNER. AND TALK TO TOWN OF HOLLYWOOD ABOUT NEW ROADS. CURRENTLY THE AREA IS PLATTED WITH 6 NEW ROADS TO BE BUILT BY THE TOWN OF HOLLYWOOD AND THE TOWN DOES NOT HAVE THE FUNDING. AFTER DISCUSSIONS WITH THE TOWN AND PROPERTY OWNER. IT WAS AGREED THAT THE OWNER WOULD INSTALL A TEMPORARY DRIVE TO ACCESS PROPERTY TO DELIVER NEW MOBILE HOME AND THE OWNER WOULD USE A CURRENT CURB CUT THAT IS LOCATED AT THE PLANNED ACCESS FOR TENTH STREET. THEREFORE AT THIS TIME NO DRIVEWAY SHALL BE INSTALLED BY SCDOT AND THE TEMPORARY DRIVE WILL HAVE TO BE BY A PERMIT.
1	357866	CHARLESTON	Curb Cuts	CAROL CANNON	N	N	SC	174	SC-174	NEED TO DO UNDER AN ENCROACHMENT PERMIT. HAS A DRIVE WAY ON DIRT ROAD & HAS NO HOUSE ON PROPERTY.

Commission 370 (N) Items not recommended for approval

Cong Dist	Req.#	County	Request Type	Requestor	Meets	Recommend	Type	Route	Road Name	Justification
1	355325	CHARLESTON	New Signals	HERNAN PENA	N	N	SC	61	ASHLEY RIVER ROAD	CONTACTED CHARLESTON COUNTY SCHOOL DISTRICT AND IT IS A PARENT DROP OFF. STUDENTS ARE PICKED UP ON THE SAME SIDE OF THE ROAD THAT THEY ARE DROPPED OFF. INTERSECTION WAS PREVIOUSLY REVIEWED AND DID NOT MEET SIGNAL WARRANTS.
1	310362	CHARLESTON	New Signals	JOSEPH P. RILEY, JR.	N	N	US	78	KING ST. EXT.	WAITING ON CITY OF CHARLESTON TO SUBMIT A SIGNAL WARRANT ANALYSIS. AS OF 9/12/08 THE CITY HAS NOT SUBMITTED AN ACCEPTABLE SIGNAL WARRANT ANALYSIS. WILL CLOSE WORK REQUEST.
1	363143	HORRY	New Signals	LYNN RAY	N	N	SC	9		THE INSTALLATION OF A STOP AND GO TRAFFIC SIGNAL IS NOT RECOMMENDED BASED ON MINIMAL TRAFFIC VOLUMES ON S-770 AND LOW CRASH RATE. SEE LETTER DATED 8-28-08 (SC9&S770(8-08)).
1	351028	HORRY	New Signals	MS. MARIAN LEWIS	N	N	US	701	HWY 701	THE TRAFFIC VOLUMES WOULD SUPPORT THE INSTALLATION OF A STOP&GO TRAFFIC SIGNAL, BUT INSTALLATION IS NOT RECOMMENDED AT THIS TIME BECAUSE THERE ARE NO LEFT TURN LANES ON THE US-701 APPROACHES. IT IS RECOMMENDED THAT THE STOP LIMIT LINE ON S-110 BE REMARKED. AN INTERSECTION CONTROL BEACON IS NOT RECOMMENDED, AS THE ACCIDENT RATE IS CONSIDERED MINIMAL AND DOES NOT INDICATE A PATTERN OF CRASHES THAT WOULD BE REDUCED WITH AN INTERSECTION CONTROL BEACON. SEE LETTER DATED 9-12-08 (US701&S110(9-08)).

Req.#	Cong Dist	County	Request Type	Requestor	Reported Date	Type	Route	Road Name	Meets Objective	Justification
362410	1	GEORGETOWN	Signage of Routes	KATHLEEN BAXLEY	8/21/2008	S	4	CHOPPEE ROAD	N	THE REVIEW DOES NOT SUPPORT A REDUCTION OF THE SPEED LIMIT; HOWEVER, IT IS RECOMMENDED THAT A 45 MPH SPEED ADVISORY BE IMPLEMENTED BECAUSE OF INTERSECTION-RELATED CONDITIONS. ALSO, THE "STOP AHEAD" SIGN SHOULD BE REPLACED. SEE LETTER DATED 9-23-08 [S4&S6(9-08)].
367109	1	HORRY	Signage of Routes	PHYLLIS OTT	9/12/2008	US	17	HWY 17 BUS 2680	N	IT IS NOT FELT THAT DEER CROSSING SIGNS ON A MAJOR HIGHWAY WOULD BE EFFECTIVE. DO NOT RECOMMEND.

363384	3	LAURENS	Signage of Routes	JOE TIMMONS	8/25/2008	SC	14	SOUTH CAROLINA HIGHWAY 14	N	PM REVIEW INDICATED BACK-UP OF PARENT PICK-UP LINE ONTO SC 14 SHOULDER. THE SCHOOL IS NOT DOUBLE-STACKING AS THE D-WAY WAS DESIGNED FOR. TALKED WITH THE PRINCIPAL, AND HE SAID THAT THEY WOULD CHANGE TO DOUBLE-STACKING. THIS SHOULD ELIMINATE BACK-UPS ONTO THE SHOULDER OF SC 14.
364532	3	GREENWOOD	Signage of Routes	LONNIE SMITH	8/29/2008	S	97	DEADFALL ROAD	N	REVIEWED AND NOTED 5 PARKED ON SHOULDER OF S-97. TOLD THEM ALL NOT TO DO PARK THERE ANYMORE, AND THEY SAID THEY WOULDN'T. I FILL FOLLOW-UP WITH LONNIE SMITH, GARY JOHNSON, AND LIKELY ALSO THE PRINCIPAL.
366657	3	LAURENS	Signage of Routes	JOE GOLDSMITH	9/10/2008	SC	56	SOUTH CAROLINA HIGHWAY 56	N	OUR POLICY FOR PROVIDING SIGNING FOR SOME TRAFFIC GENERATORS DOES NOT INCLUDE RETIREMENT/NURSING HOME FACILITIES. I ADVISE COMM. DALTON AND MR. GOLDBERG THAT WE ARE UNALBE TO PROVIDE SIGNS.
365896	3	SALUDA	Pavement Markings	HUNTER	9/4/2008	S	25	SPANN ROAD	N	DUE TO RESIDENCES DIRECTLY ADJACENT TO S-25 IN THE AREA, RUMBLE STRIPS NOT RECOMMENDED. IN RESPONSE TO WORK REQUEST 365878 ON THE SAME DATE, I WILL BE LOOKING INTO INTERSECTION SAFETY AT S-25 AND S-26.
366673	3	LAURENS	Pavement Markings	DOROTHY MAHANA	9/4/2008	S	289	AIRPORT ROAD	N	DISCUSSED WITH MIKE JONES. GAVE HIM THE SAME OPTION AS MY PREVIOUS 8/21/07 E-MAIL. THEY COULD REMOVE ALL THE PAVEMENT IN THE CORNER AND DEFINE 2 DRIVEWAYS INSTEAD OF THE ENTIRE OPENING ALONG THE FRONTAGE.

Cong Dist	Req.#	County	Request Type	Requestor	Meets	Approval	Type	Route	Road Name	Justification
5	358539	KERSHAW	Signage of Routes	MRS. KERYN ISENHOWARD	N	N	S	564	SURREY LN	DO NOT RECOMMEND THE INSTALLATION OF NO LITTERING SIGNS AT THIS TIME. THESE TYPES OF SIGNS ARE TYPICALLY USED IN AREAS WHERE THERE ARE CONCENTRATED AREAS OF DUMPING OR WHERE LITTERING IS PREVALENT. OUR REVEAL DID NOT INDICATE A LEVEL OF LITTERING THAT WOULD NECESSITATE A NEED FOR SUCH SIGNS.
5	356014	YORK	Signage of Routes	SC HIGHWAY PATROL	N	N	SC	161	HWY 161	ALSO, CHECKED SC 161 00 00 9.86 BOTH SHOULDER AND S 23 00 00 10.73 BOTH SHOULDER - COULD NOT LOCATE ANY SIGNS TO BE DOWN OR MISSING AS FAR AS THIS WORK ORDER. SOME OF THIS AREA IS UNDER CONSTRUCTION CURRENTLY AND EVENTUALLY WILL BE RE-EVALUATED FOR NEW SIGNAGE.
5	353699	SUMTER	Signage of Routes	MARK SWEETEN	N	N	S	986	BROOKLAND DR.	A CHANGE IN THE EXISTING 30 MPH SPEED LIMIT IS NOT RECOMMENDED, AS THE DEPARTMENT MUST SET SPEED LIMITS THAT ARE REALISTIC AND REFLECT ROAD CONDITIONS IN ORDER TO INSURE DRIVER COMPLIANCE AND PERMIT REASONABLE ENFORCEMENT. IF SPEEDING IS OCCURRING THEN ENFORCEMENT OF THE POSTED SPEED LIMIT IS THE PROPER RESPONSE, NOT A REDUCTION IN THE POSTED SPEED LIMIT. HOWEVER, IT IS RECOMENDED THE EXISTING SPEED LIMIT SIGNS BE REPLACED.

A REVIEW OF THE ACCIDENT HISTORY REVEALED THAT THERE HAVE BEEN NO ACCIDENTS REPORTED AT THIS INTERSECTION IN THE PAST THREE AND A HALF YEARS. THE ACCIDENT STATISTICS TENDS TO INDICATE THAT THE INTERSECTION IS OPERATING SATISFACTORILY. THEREFORE NO CHANGE IN EXISTING TRAFFIC CONTROL IS RECOMMENDED.

6	348151	SUMTER	Signage of Routes	JIMMY JAMES	N	N	S	40	ST. PAUL CH.RD.	THE SPEED LIMIT IS REDUCTED AT THE CURVE WITH CURVE WARNING SIGNS AND 45-MPH SPEED PLATES. THE SIGHT DISTANCE ALONG ST. DETAILED DESCRIPTION:

In-Service Bridge Engineering Services for the Ravenel Bridge System and Other Selected Coastal Bridges: The SCDOT wishes to enter into an "asset management" contract for selected bridges that are both unique, critical and economically important to the Beaufort, Berkeley and Charleston areas of the low country of SC.. Commission approval to proceed to the RFQ, RFP and selection stages was given on January 18, 2007.

The responses for the RFP were received on September 19, 2008 and the Ravenel AM Project Committee met and scored the proposals on September 30, 2008. Based on the scoring, Infrastructure Corporation of America (ICA) was the winning proposer. The lump sum cost of their proposal for a 2 year term is $4,524,000. There is an option to extend the contract during the initial term based on SCDOT satisfaction with performance and Commission approval. Funding for this project is budgeted in the previously approved 2009 State Program.

For a synopsis of this project concept and a listing of the bridge systems included in this project, please see attachment.

MEMORANDUM

TO: Tony L. Chapman, P.E., Deputy Secretary for Engineering

FROM: James, J. Feda, Jr., Director of Maintenance Feda

DATE: October 1, 2008

RE: Ravenel Asset Management Project Selection from RFP

On September 30, 2008 the Ravenel Asset Management Committee met to score the four proposals that were received on September 19, 2008. After the technical scoring was completed the cost proposals were then opened in order to complete each proposers overall score as follows.

Each proposers cost for the initial two year project was then divided by their technical score in order to arrive at an adjusted cost. The technical score is shown as a decimal score, i.e. a technical score of 93 is expressed as 0.93. The lowest adjusted price is the top ranked proposal. Shown below are the results:

Rank	Proposer	Technical Score	Project Cost	Adjusted Project Cost
1	**ICA**	**0.93**	**$4,524,000**	**$4,864,516**
2	VMS	0.65	$5,865,000	$9,023,076
3	DBi	0.55	$7,777,777	$14,141,412
4	Team United	0.90	$15,622,000	$17,357,777

As you can see from the table above Infrastructure Corporation of America (ICA) was the top ranked proposal. Please advise as to what the next step should be in moving this project forward and if additional information is needed.

AN EQUAL OPPORTUNITY
AFFIRMATIVE ACTION EMPLOYER

In-Service Bridge Engineering Services for the Ravenel Bridge System and Other Selected Coastal Bridges

Asset management contracts where the responsibility for maintaining transportation assets have been previously used in other southeastern states, most notably Florida and Virginia. This would be a first of its kind project for bridges in South Carolina.

For this project there are two primary driving forces as follows:

1) To assist the SCDOT in maintaining several unique, critical and economically important bridges in the Beaufort, Berkeley and Charleston areas of the SC low country. This would also include assisting SCDOT in maintaining the warranties on bridges such as the Ravenel Bridge System and the SC 170 bridges over the Broad River and Chechessee River.

2) By turning responsibility for these bridges over to an "asset management" contractor, Engineering District 6 will be able to shift resources normally assigned to these bridges to maintain other bridges.

A listing of the bridge systems included in this contract is provided below:

Bridge System	County	Facility Carried
1	Beaufort	SC 170 over Broad River
2	Beaufort	SC 170 over Chechessee River
3	Berkeley	I-526 over Cooper River (Don Holt-Mark Clark Expressway)
4	Charleston	Ravenel Bridge System (18 structure units)
5	Charleston	I-526 over Wando River (EBL & WBL) (Mark Clark Expressway)
6	Charleston	SC 517 over ICWW (Isle of Palms Connector)
7	Charleston	SC 30 over ICWW/Ashley River (James Island Expressway)

177

The required work included in this contract is divided into two main areas as follows:

I. Required Services

The items of work described below are to be completed in this contract.

Contract Management: This item deals with carrying out the non-field operational aspects of the contract. This work includes the following:

a. **Project Office**

b. **Data Management**

c. **Public Relations**

Required Asset Inspection: This item deals with all the required structure inspections. The consultant shall perform structural inspections for each bridge/system and the elements identified according to all applicable laws, procedures and guidelines as required by the FHWA, AASHTO, OSHA, EPA, SCDOT, SCDHEC and any bridge specific inspection and maintenance manuals. Other elements will be inspected according to FHWA, AASHTO, SCDOT, OSHA, EPA, SCDHEC and any applicable **Inspection and Maintenance Manual**, and warranty level inspection requirements.

Required Asset Maintenance: This item pertains to specific maintenance actions required above and beyond the bridge specific inspection and maintenance manuals and will be performed according to SCDOT levels of service. i.e. additional sweeping, drain cleaning, lighting and ITS maintenance.

Proposed Outstanding Work: This is work that has been identified as necessary by SCDOT to be performed as soon as the contract is executed, the cost of which is included in the contract price.

II. Asset Warranties

Required Asset Warranty Services: Those activities, which are warranty driven, except bridge washing, shall be performed in a manner so as to maintain the specific warranties of the applicable elements. Other elements will be maintained according to FHWA, AASHTO, SCDOT, OSHA, EPA, SCDHEC and any applicable **Inspection and Maintenance Manual**, and warranty level inspection requirements. Other specific actions required will be performed according to approved SCDOT levels of service.

A third component which will be negotiated as necessary beyond the lump sum contract is as follows:

III. Potential Services

Due to the nature of the items of work described below, it is unknown how often these services will be needed during the life of the contract. Therefore, under the terms of this

contract, SCDOT reserves the right to direct the consultant to perform these work items if and when it becomes necessary in the interest of the State. The consultant shall perform these work items upon written direction by SCDOT in an expeditious manner.

These items of work, if executed, will be added to the contract via change orders and will be reimbursed on a cost plus fixed fee basis.

a. **Interim Maintenance and Repairs:** The results of the required structural and non-structural inspections shall be used to determine both short and long term maintenance activities as approved by the SCDOT. There may be times when interim maintenance actions need to be taken. Traffic control, if needed, must be approved by the SCDOT prior to performing the maintenance and repairs.

b. **Interim/Emergency Inspection:** Any response necessary will be coordinated with the SCDOT and the local District Traffic Management Center. All traffic control operations necessary for an emergency response will be approved by the SCDOT before implementation and may be subject to change based on traffic or weather conditions. The cost for this shall be based on the mobilization of one inspection team including equipment.

c. **Incident Response:** All responses will be coordinated with the local District Traffic Command Center. All traffic control operations necessary for an incident response shall be approved by the SCDOT before implementation and may be subject to change based on traffic and/or weather conditions.

d. **Other Engineering Services:** Other engineering services may include assistance in load ratings and overweight permit analysis as necessary and approved by the SCDOT.

Interstate Maintenance Submittal

Description: Request the Commission consider an amendment to the Interstate Maintenance Program in the STIP to include the additions of the highlighted projects shown below. These three projects were approved by the Commission in September 2007 as candidate projects in the 2008 and 2009 Interstate Maintenance priority list, but were not initially programmed due to an overlap with potential interstate widening needs on I-26. As a result of the approved increase in Interstate Maintenance funds for 2009, and the determination that there will not be an interstate widening project at these three locations at this time, staff is recommending that these projects be considered for available funding from the Interstate Maintenance program.

COATS Project Ranking Submittal

Description: The Columbia Area Transportation Study (COATS) is in the process of updating their urban Long Range Transportation Plan. During this update, COATS indicated a desire to modify their project ranking and selection process. The SCDOT Commission previously ratified the COATS process to be in compliance with the criteria outlined in ACT 114. The COATS Board has since included a category of right of way preservation to the ranking process to reward localities for preserving right of way along roadways in the event that the road is widened in the future. In addition, the COATS Board has modified the weighting for each of their ranking criteria.

NEW SAFETY IMPROVEMENT PROJECTS

(For your consideration to be approved at a future Commission Meeting)

Remaining CRISOS Projects

The CRISOS Program originally identified 130 roads for safety improvements based on criteria as presented and approved in the 2008 State Program. For your information, the criteria previously approved are provided on the next several pages. Work on 120 of these 130 identified projects is under construction or complete. Most of the completed projects identified short and intermediate term improvements such as signing and pavement marking. Ten projects requiring intermediate term improvements have been under development using funding from the FY 08 budget and are ready to proceed to the construction phase. These remaining ten projects are being submitted for Commission approval. Work on these projects includes low cost engineering strategies such as shoulder widening/paving, additional guardrail, rumble strips, etc.

County	Congressional. District	Road	Estimated Costs
Fairfield County	5	S-3	$1.8 million
Laurens County	3	S-29	$1.3 million
Laurens County	3	S-76, S-67, S-43	$3.4 million
Lexington County	2	S-204	$1.0 million
Georgetown County	1	S-42	$2.5 million
Charleston County	1	S-20, S-54, S-91	$0.5 million
Total			**$10.5 million**

Once the improvements to these ten remaining roads are implemented, no further work is expected to take place on any road from the original list of 130 roads. The engineering safety effort will continue under the new program titled State Rural Roads Safety Program as presented and approved in May 2008.

CRISOS SELECTION CRITERIA

(Reviewed and approved by the Commission September 20, 2007)

Comprehensive Road Selection
By Severity Rating Formula

- Only state secondary roads are included
- Two listings of secondary roads were generated by the following criteria and separated by federal and non federally funded
- Minimum of 4 fatal crashes within the last three years or a minimum of 50 collisions within the last five years
- Average Daily Traffic (ADT)
- Road length that is less than 20 miles in length, except spot improvements
- Total collisions during the five year period
- Total number of fatalities
- Total number of crash injuries
- Road length; the annual vehicle miles traveled
- Mileage death rate (per 100 million VMT)
- Annual crashes per million VMT
- Annual crashes per mile of road
- A severity rate calculated from the number of crashes, number of injuries, fatalities x 10, crash rate per million VMT x 100, the crash rate per mile of roadway x 10 on the entire route. For routes without VMT data, a proxy value equal to the average for all routes will be substituted

***the factors in this formula were selected by the original CRISOS board

- Secondary roads will be listed in priority order according to the severity rating for the entire route

- Compared it with other Engineering databases for similarities

- Secondary roads that appeared on both listings were pulled out for further examination

- Engineering examined the list to eliminate those roads that were substantially urban in nature and/or had significant projects already under way

- Remaining list of screened projects are ranked by the original severity formula based on the entire route into three groups:

    1) Roads with a severity ranking above 500.00
    2) Roads with a severity ranking below 500.00 and above 350.00
    3) Roads with a severity ranking below 350.00

- Engineering will select and refine projects to be grouped into three sub categories based upon the ranking above. Engineering will determine the roads to be let together based upon budgeted dollar amounts, work to be completed, county of work, and what level of work is needed on and portion of the road. Three levels have been identified:

    a) Short Term- These projects can be completed within 1 year with in SCDOT right of way. These types of improvement are items that can be done quickly by DOT maintenance forces. Examples would be signing and pavement marking revision, clearing sight areas, etc.
    b) Intermediate-This group includes safety upgrades along the existing routes identified that will require up to 24 months to complete and are with in SCDOT right of way. These are short term contracting items such as guardrail installation, utility pole relocations, turn lanes at intersections, shoulder paving if shoulder widening is not needed, etc.
    c) Long Term-This group of projects will take 2+ years to complete. This would consist of significant clearing, widening and paving shoulders, chip seal with centerline rumble strip markings, etc. 5 projects were recommended by contracted consultants as being the most feasible projects that could advance the quickest including right of way and environmental

considerations and they encompass all three ranking groups. There will coordination between the Traffic Engineering and Pre-Construction to ensure no duplication of solutions.

PROACTIVE MEASURES

Proactive measures are designed to mitigate problems before they arise. These measures are being implemented because of proven National/SCDOT research. These roads may or may not have high crash data; however, they exhibit some of the same characteristics as the other roads that have high crash data. Identification of these roads will be the responsibility of Traffic Engineering, the Maintenance office, and the districts utilizing a Non Federal Aid Secondary Road list, of urban and rural roads developed from RIMS data. By implementing these measures, we are trying to prevent crashes before they happen. Data will also be collected for three years prior to implementation and three years after implementation. These are low cost measures that can be implemented in a short time by utilizing our maintenance forces.

State Rural Road Safety Program Submittal

At the commission meeting on May 14th 2008, the criteria for the new state rural road safety program was approved along with funding for the program in the amount of $16 million for 2009. As previously presented, $10.5 million is recommended to be used to complete the old CRISOS program as shown on previous page.

The purpose of this new program is to improve safety on rural 2-lane roads in South Carolina by reducing the number of crashes, injuries, and fatalities through the implementation of low-cost, short-term engineering strategies. These two-lane roads include both state and federal aid eligible routes. Project selection for this program will begin with crash research and analysis of all 2-lane rural roads within South Carolina and then determine which roads have a statistically higher than average crash rate and/or severity rate.

Beginning with the roads exhibiting the worst crash and/or severity rates, each route will be further examined to identify potential projects for this program. These studies will include the identification of any and all appropriate countermeasures and the feasibility of the implementation of the proposed improvements. Project selection and prioritization will then be based primarily on the results from these studies. Additional consideration will also be given to the environmental impacts, how the project relates to SCDOT's strategic highway safety plan, as well as input from district engineering staff, law enforcement, and the general public.

The following prioritized list is being submitted for approval so staff can move forward with design and implementation of low cost improvements as far as funding will allow.

Approval of Additional Federally Funded Safety Projects

(For your consideration to be approved at a future Commission Meeting)

At the commission meeting on August 21st 2008, funding in the amount of $39 million was approved for the safety program for Federal Fiscal Year 2009. This was a budget increase of $18 million over the previously approved funding amount.

As a result, three project lists are being submitted for approval for design and construction as funding will allow. The first list includes intersection improvement projects and statewide special safety projects. The special safety projects will address locations with patterns of run off road crashes, many of which result in fatalities. These projects have the potential for the greatest crash reduction.

The next list is a prioritized list of interstate segments that is being submitted for approval to begin design and construction as funding allows. This list has been created based on the previously approved criteria for the safety program which included a review and analysis of the most current 3 to 4 years of interstate crash records.

The final list is a prioritized list of intersections that is being submitted for approval to begin the implementation of safety improvements. These improvements will consist of low-cost engineering strategies such as additional signing and/or pavement markings. This list has been created based on the previously approved criteria for the safety program and will help SCDOT meet its current strategic goal of reducing crashes on a statewide basis by 3% annually. This list consists of 2200 intersections with the highest number of crashes out of the 195,000 total intersections on the state system. This represents approximately 1% of the total intersections but accounts for 67% of the intersection crashes.

Safety Funds
Highway Safety Improvement Program
Selection Criteria

The first step in the project selection for this program is to identify spot locations throughout the state that that have a statistically higher than average crash rate and/or severity rate (fatals, injuries, property damage). These locations are then separated into like categories (single lane intersections, multi-lane intersections, 2-lane sections, etc.) and ranked in each category based on the calculated rates.

Starting with the top ranked locations in each category, the locations are then further studied to identify potential safety projects. These studies include the identification of any and all appropriate countermeasures and determining the feasibility of the construction of all proposed improvements.

The next step is to conduct a systematic evaluation for each of the top locations to compare the economic advantages and disadvantages for each proposed alternative. Project selection is then established based upon this evaluation.

In addition, project selection also gives consideration to environmental impacts and the SCDOT strategic highway plan objectives as well as input from the district engineering staff, law enforcement, and the public. Also, partial funding from other sources such as COG, CTC, County or City governments are considered in the section process.

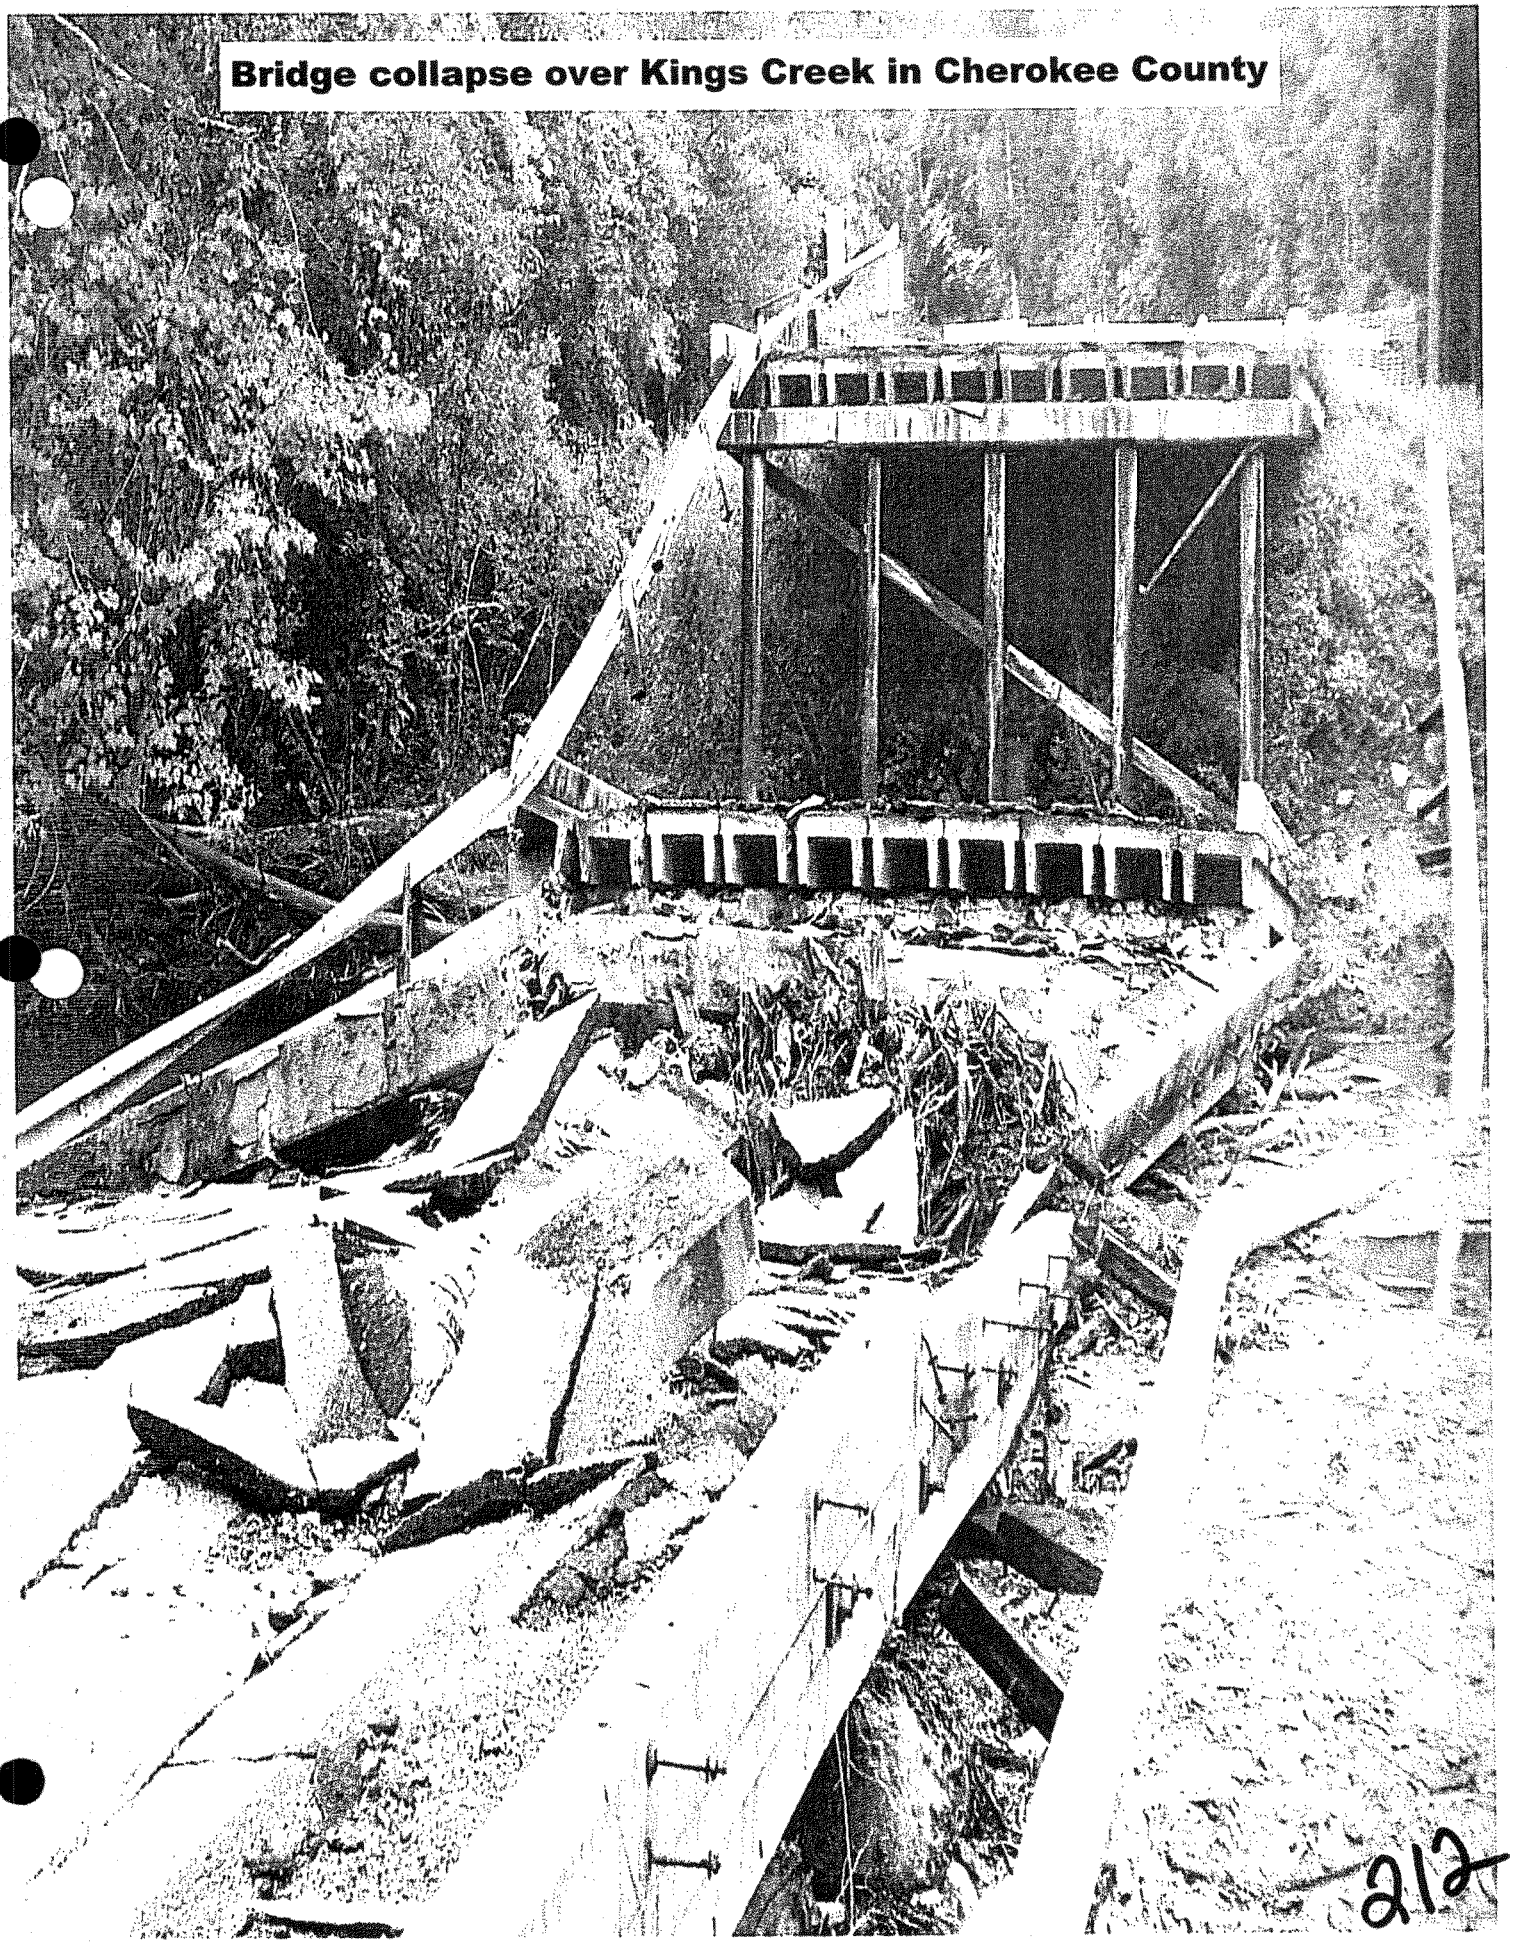
Bridge collapse over Kings Creek in Cherokee County



212

Bridge Collapse over Kings Creek in Cherokee County

During the early dawn of August 27, 2008, remnants of Tropical Storm Fay caused significant flooding of several streams in Cherokee County. This flooding caused debris to collect against the piles of the bridge on S-11-209 over Kings Creek. The bridge partially collapsed due to this debris loading. Since the pile support system was significantly stressed laterally, a repair was not feasible and the majority of the remaining spans have since collapsed resulting in a net detour length of 10 miles. (See attached photos)

The bridge was originally constructed in 1960 and in 2007 had an average daily traffic count of 250 vehicles. The bridge, in its present state, would rank at the top of the federal bridge replacement list based on the approved Commission criteria. **It is recommended that this bridge be added as a Commission approved project to the federal bridge replacement list.**

The Governor issued an Executive Order on September 17, 2008, declaring this bridge collapse an emergency and directing the South Carolina Department of Transportation (SCDOT) to take all necessary action to obtain approval by the Federal Highway Division Administrator to make federal emergency relief funds available to South Carolina. A formal request was made to the FHWA on September 30, 2008, for this funding request. Preliminary cost estimates are included in the attached correspondence.

It is also recommended that the Commission approve SCDOT to solicit and negotiate a contract to replace this bridge as quickly as possible.

Office of the Governor

EXECUTIVE ORDER NO. 2008-11

WHEREAS, on August 26, 2008, Tropical Storm Fay brought heavy rains, flooding, and tornadoes to the upper and western parts of South Carolina; and

WHEREAS, heavy rains washed large amounts of debris downstream causing damage to roadways in the State, in particular, the collapse of a bridge on a federal aid highway at the Cherokee and York County line; and

WHEREAS, damage to the affected areas of the State were of such extent that immediate repairs are necessary and such conditions constitute an emergency as is contemplated by the terms of Section 125 of Title 23, United States Code.

NOW, THEREFORE, pursuant to the authority vested in me by the Constitution and Statutes of this State, I hereby declare that an emergency exists in the storm-affected areas in York and Cherokee counties as a result of heavy rains and consequent danger to life and damage to property, including a bridge on a federal aid highway. I direct the South Carolina Department of Transportation to undertake actions to replace the collapsed bridge to ensure the security and well-being of the citizens of the State of South Carolina. I further direct the Department of Transportation to take all necessary action to obtain the approval of the Federal Highway Division Administrator to make Federal Highway Division Emergency Relief assistance available to the State.

GIVEN UNDER MY HAND AND THE GREAT SEAL OF THE STATE OF SOUTH CAROLINA, THIS 17th DAY OF SEPTEMBER, 2008.

Mr. Robert L. Lee
Division Administrator
Federal Highway Administration
1835 Assembly Street, Suite 1270
Columbia, South Carolina 29201

RE: Request for Emergency Relief Funds

Dear Mr. Lee:

Under the provisions of Title 23 U.S.C., Section 125, the South Carolina Department of Transportation requests the approval of emergency relief funding to assist in the costs of repairing damages to Federal-aid highways in South Carolina caused by heavy rainfall and flooding associated with Tropical Storm Fay on August 26, 2008. Attached is a copy of Governor Mark Sanford's disaster declaration which was issued on September 17, 2008.

Damage to Federal-aid highways is limited to the collapse of the S-209 Bridge over King's Creek at the Cherokee/York county line. In conjunction with your staff, we have conducted field reviews of the damaged site and developed a cost estimate for removal of the existing bridge and debris, along with a new replacement structure. Replacement of this structure is considered beyond the scope of extraordinary maintenance and the SCDOT hereby requests emergency relief funds in the amount of $1,852,750 to cover both emergency and permanent repairs as soon as possible.

We are proceeding to maintain traffic in the area via detour routing and to undertake limited repairs to prevent further damage.

Sincerely,

Tony L. Chapman, P.E.
Deputy Secretary for Engineering

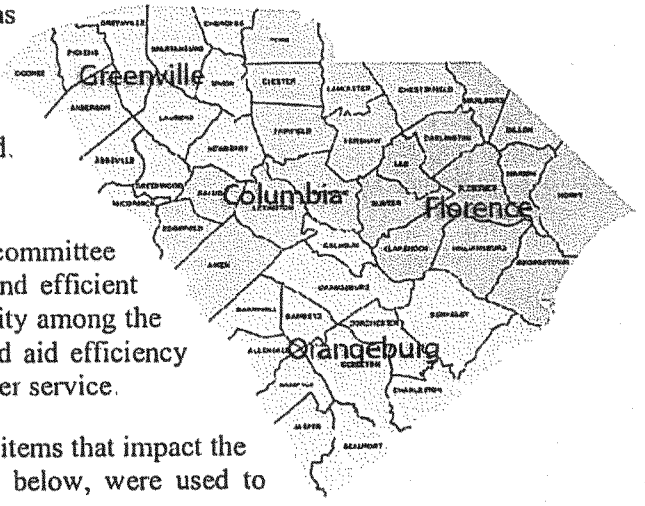
In October 2005, the SCDOT Commission directed SCDOT staff to review the number and territory embraced by each highway district as required by Act 181. A committee of employees from across SCDOT was formed utilizing members from administration, auditing, engineering, and the districts, as well as the FHWA. Information and options developed by this committee were presented at the August and September 2008 SCDOT Commission meetings, with the need of a Commission recommendation by the end of 2008.

At the September 2008 meeting, the Commission asked that staff return in October and provide an overview of the four options, as well as a list of "pros and cons" for each of the scenarios.

History

To begin the review process, the committee first looked at the history of how the engineering districts were aligned, the requirements of the statute, and established an evaluation methodology based on their collective experience and the original review conducted in 1998. From this information, the committee could evaluate multiple alternatives and develop recommendations for the Commission. Listed below is a summary of the committee's procedures, proposed options and the challenges and opportunities each option would provide.

The initial highway district structure was established in 1920 and divided the state in four sections as shown to the right. This structure was utilized until 1955 when the current seven district alignment was established.



Work Load Data and Formula

In order to address the statute, the committee sought to establish a definition for "proper and efficient performance," and focused on obtaining equality among the districts as it relates to work load. This would aid efficiency through improved internal and external customer service.

The committee collected data on many items that impact the work load in a district. These factors, listed below, were used to develop a work load score for each district

- Lane Miles Per County
- Population By County
- Vehicle Miles Traveled
- Employee Positions By County
- District Outsourcing
- Southeast States Comparison
- Work Requests Per County
- Customer Opinion
- Level Of Service Of System
- Equipment Per County
- Anticipated Construction
- Population Growth

The work load scores were weighted using four categories as shown below. Work load scores could range between 0 and 200 for each of the four categories, with 100 being an average score for a category.

- Population – 30%
- Lane Miles Maintained – 30%
- Annual Vehicle Miles – 30%
- Land Area – 10%

Southeastern Comparison

The next step of the evaluation process was to look at the district alignment in other southeastern states and compare the factors of miles maintained, population, employees, and funding. For this comparison, South Carolina is near the average for population, but has the second highest number of road miles per district. The comparison also revealed that SCDOT ranks near the bottom in maintenance employees and state dollars per road mile.

State	Number of Districts	Road Miles Per District	Population Per District	Maintenance Employees Per State Maintained Mile	State Dollars Per State Maintained Mile
Alabama	*9*	*2,224*	*501,000*	0.36	$856K
Florida	*7*	*1,721*	*2, 292,842*	0.13	$3.684 Million
Georgia	*7*	*2,585*	*1,220,868*	0.17	$1.163 Million
Louisiana	*9*	*1,871*	*463,000*	0.08	$927K
Average	*9*	*3,525*	*673,800*	0.13	$1.362 Million
Mississippi	*7*	*1,798*	*502,000*	0.10	$571K
North Carolina	14 Divisions	5,665	608,000	0.06	$1.858 Million
South Carolina	*7*	*5,926*	*573,000*	***0.08***	***$672K***
Virginia	*9*	*6,411*	*849,000*	0.08	$1.163 Million

Alignment Alternatives

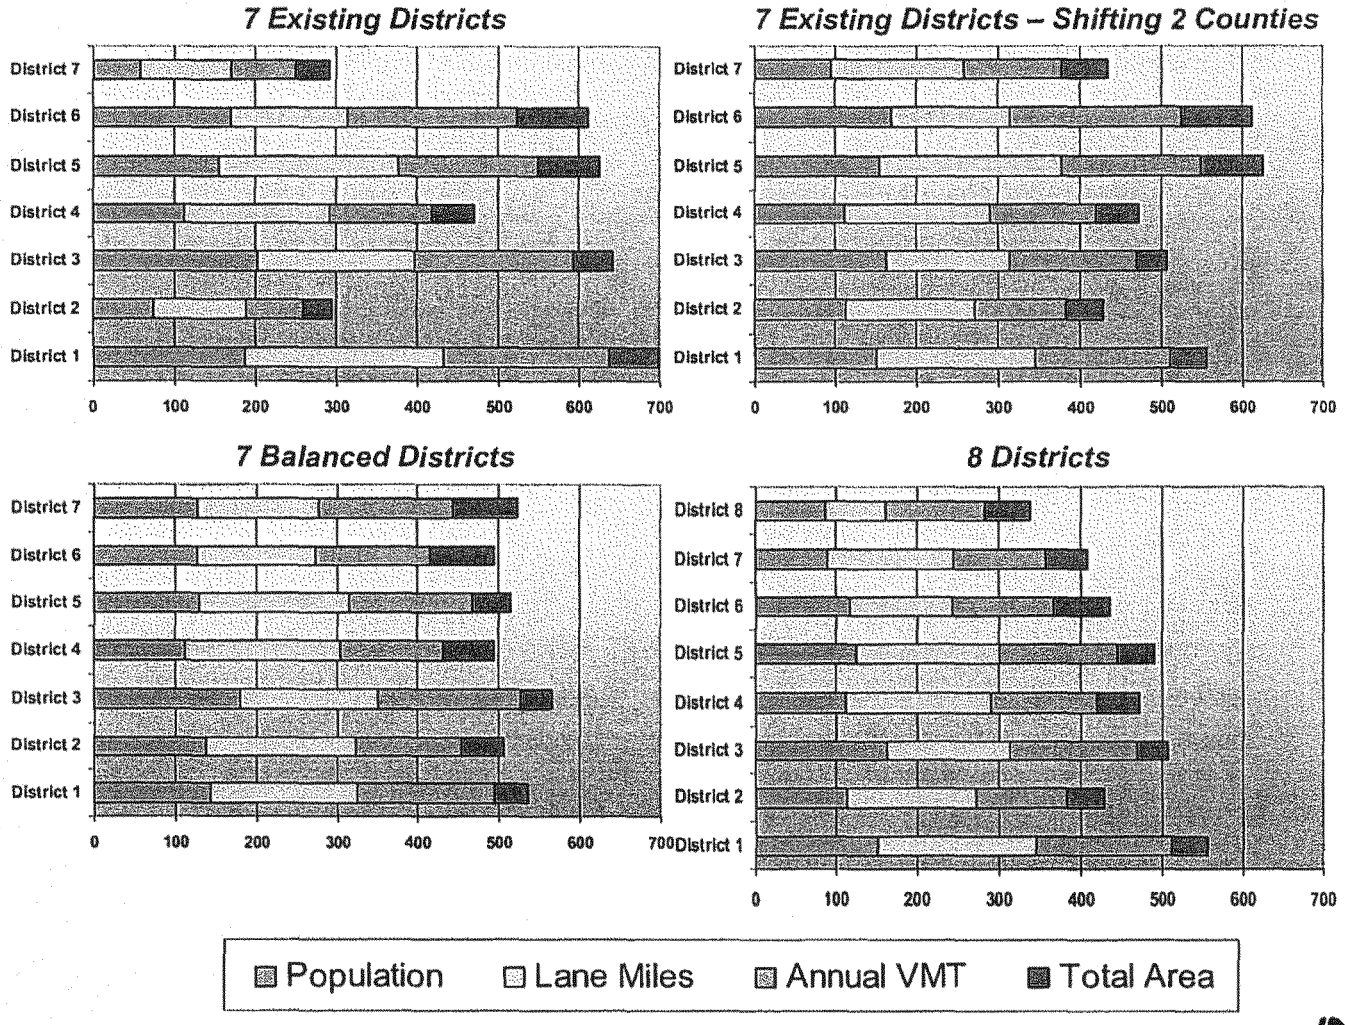
Next, the committee developed six scenarios to evaluate, including the existing seven district alignment.

- 7 Existing Districts
- 4 Districts (based on Regional Production Groups)
- 5 Districts
- 7 Existing Districts – Shifting Two Counties
- 7 Districts – Balanced (for work load and travel time)
- 8 Districts

However, the alternatives utilizing four or five districts were eliminated because of the impacts on customer service and the growing population served by SCDOT. In addition, the four and five district alignment options do not move the districts toward a more equally distributed work load as the other options. In fact, reducing the number of districts redistributes and increases the work load on a fewer number of districts and puts a strain on the district facilities to handle the additional staff. Placement of the existing staff in the districts that would be eliminated also presents a major concern with these options. Work load scores were developed and evaluated for the remaining alternatives

Work Load Scoring

To help guide the proposed alternative alignments, the committee evaluated work load scores for each of the options. This allowed the committee to quantify many of the tasks performed in each district proposal using the criteria of population, lane miles maintained, vehicle miles traveled, and land area. This analysis revealed discrepancies in the work loads under the existing alignment, while other options would allow for a more equitable distribution of the work load. However, work load scores are only a portion of the analysis and the committee's effort to investigate the requirements of the statute.



Cost Estimates

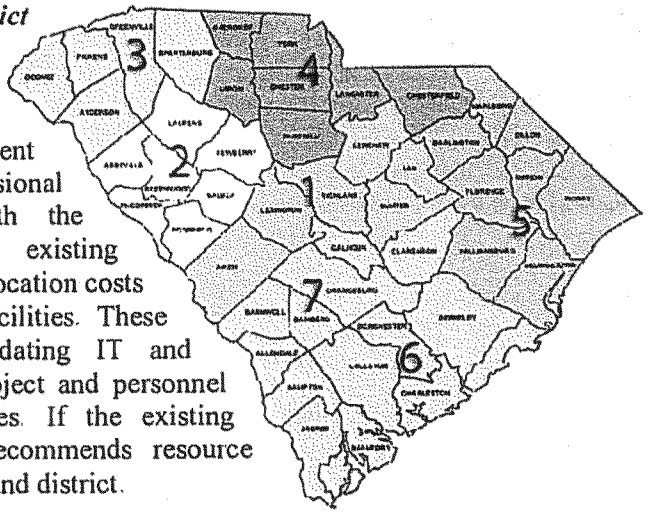
The committee also analyzed the projected costs of each alternative. There will be some initial costs associated with transferring records and reconfiguring IT systems and accounting protocol with each of the three new alternatives. However, the two options that maintain the seven district structure will utilize existing resources and be the most cost efficient. Adding an eighth district will have initial costs including vehicles, facilities, equipment, and a new district office. Recurring costs include full time positions (based on a midrange salary and benefits) and an annual budget for an eighth district (based on existing District 2 budget).

Retain the Existing 7 District Alignment
7 Existing – Shifting 2
7 Balanced
Limited Additional Costs

8 Districts

Initial Costs	$4,000,000
Recurring Annual Costs	$1,800,000

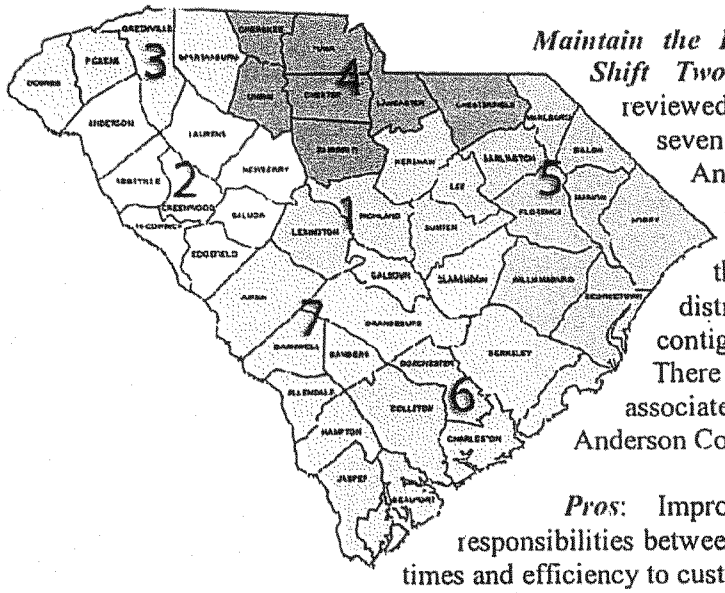
Synopsis of Alternatives



Retain the Existing 7 District Alignment. The committee recognizes the impacts any proposed district boundary shift would pose on short-term workflow and efficiency. Changes to the current structure would change working and professional relationships within SCDOT and with the customers we serve. Preserving the existing alignment would save on administrative relocation costs and maintain centrally located district facilities. These initial administration costs include updating IT and accounting file structures, transferring project and personnel files, and reallocation of some resources. If the existing alignment is retained, the committee recommends resource allocation be reviewed within each county and district.

Pros: No relocation or construction costs; No implementation impact; Existing relationships between municipalities, legislators, and county staffs are retained

Cons: Districts remain unbalanced with respect to work loads and levels of responsibility; Does not address population growth and demographic changes; Would require further analysis and reallocation of resources; Urban districts would continue to grow in staff with limited senior staff, thus reducing oversight capabilities; Does not improve level of customer service; Neither smaller district currently works with a Metropolitan Planning Organization (MPO)

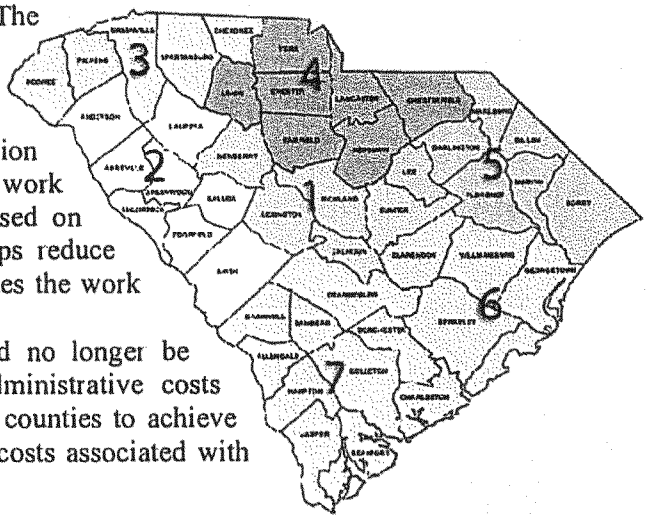


Maintain the Existing Alignment 7 District and Shift Two Counties. The second option reviewed by the committee is to maintain the seven existing districts, and to shift Anderson County to District 2 and Aiken County to District 7. This option offers the benefit of reducing the work load of two large urban districts and the shifting counties are each contiguous to our smallest rural districts. There will be initial administrative costs associated with transferring Aiken and Anderson Counties.

Pros: Improves the balance of work loads and responsibilities between the districts; Improves the response times and efficiency to customer requests; No relocation costs for personnel; Negligible implementation costs; Satisfies Act 181 and is the least disruptive to current work flow; Opportunity for professional growth and development of employees in smaller districts; Adds a growth area to both Districts 2 and 7

Cons: Moderate disruption of professional relationships in two affected counties; Does not provide maximum balance of work loads and levels of responsibility; Does not provide any assistance for Districts 5 and 6; Minor increase in travel time from District Office to Anderson Maintenance Office; Improved levels of district oversight for Aiken and Anderson counties as well as the other counties in Districts 1 and 3 is at the expense of less district oversight of the rural counties in Districts 2 and 7; Notion that realignment is necessary implies that problems exists and could impact morale

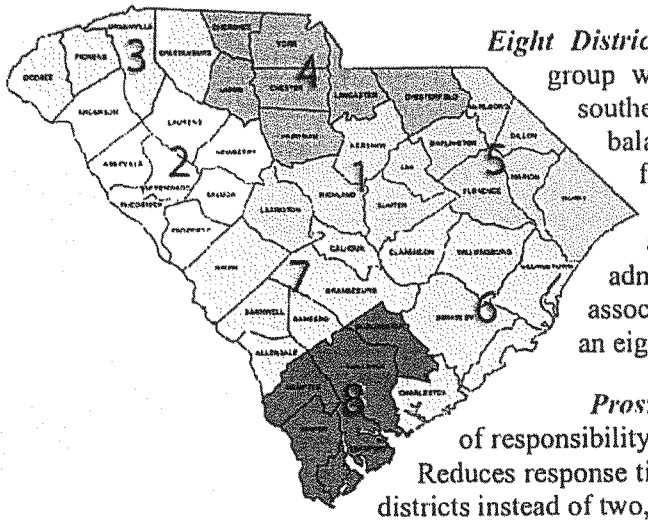
Seven Balanced Districts. The committee thoroughly studied existing district work loads as the primary analysis tool for evaluating the district alignment for proper and efficient operations. One option studied was to create seven districts with work loads distributed as evenly as possible based on geographic alignments. This approach helps reduce the size of urban districts and better allocates the work load to the seven existing district offices.



However, the district offices would no longer be centrally located and there would be administrative costs associated with shifting a total of fourteen counties to achieve this balance. Additionally, there would be costs associated with establishing professional relationships.

Pros: Provides maximum balance of work loads and levels of responsibility; No relocation or construction costs; Moderate implementation impact

Cons: Moderate disruption of relationships between municipalities, legislators, and county staffs associated with shifting 14 counties to new districts; Moderate difficulty in transferring records of affected counties to new districts; Minimal difficulty in reallocating maintenance funding; District Offices will not be as centrally located as they are now; May require additional district staff for District 2 and 7 as they dramatically increase their work loads



Eight Districts. An appealing option studied by the group was to create an eighth district along the southern coast of the state. This alignment would balance work loads and create an opportunity for better customer relations across the state. This would also be the most costly alternative. In addition to the initial administrative costs, there would be costs associated with the construction and operation of an eighth district office.

Pros: Improves balance of work loads and levels of responsibility; Models growth patterns of South Carolina; Reduces response times in most districts; Provides three coastal districts instead of two, thus improving emergency response

Cons: Most costly alternative – requires additional staff and facilities; Difficulty in maintaining historical records; Significant implementation difficulty; Moderate disruption of professional relationships in the affected counties; Need for Budget and Control Board approval to construct new facilities – *which will be a challenge in today's tough economic climate*

Summary

If the Commission elects to maintain the existing 7 district structure, the committee recommends reviewing resource allocation within each county and district to obtain optimum efficiency.

Each of the remaining three options gives the Department opportunities to improve and grow. The option for an eighth district provides a more evenly distributed work load and additional opportunities for interfacing with our customers in the low country. However, it is the costliest alternative identified. The balanced approach evenly distributes the work load, but would require shifting of over a dozen counties and some district offices would no longer be centrally located. The option of shifting two counties would more effectively allocate the work load within the seven established district offices and be the least disruptive to our current workflow. This shift also falls within the proposed alignment for establishing an eighth district along the southern coast should the Department decide to establish an additional district office. For these three options, the committee determined that a July 1 implementation date would be the least disruptive to our procedures and recording keeping.

Recommendation

After studying each of the options developed by the committee, Secretary Limehouse and Deputy Secretary for Engineering Chapman believe that shifting Anderson County to District 2 and Aiken County to District 7 is the best approach for realignment. This alternative can be implemented with limited disruption to SCDOT's current work flow and has negligible costs. This reduces the work load for two large urban district offices and offers increased opportunities in our two most rural district offices. Implementation should be finalized by July 1, 2009.

Requested Motion

I move that the Commission _____

A. retain the existing 7 district structure
B. shift Anderson County to District 2 and Aiken County to District 7
C. balances the seven engineering districts
D. create an eighth district

as proposed by staff. This action by the Commission will complete our review of the number of highway districts and the territory embraced and assures the proper and efficient operation of the districts as required by Act 181 of the South Carolina Code of Laws.

JOB ACCESS AND REVERSE COMMUTE (JARC) AND NEW FREEDOM PROGRAMS FUNDING GUIDELINES FOR FFY 08 AND FFY 09

Funding Guidelines for the Job Access and Reverse Commute program (JARC) (Section 5316) and the New Freedom program (Section 5317) for federal fiscal years 2008 and 2009 has been amended to address specific transportation needs in the state. These specific needs are summarized below.

Background:

The goal of the JARC program is to provide access to transportation services to employment and employment related activities for welfare recipients and eligible low-income individuals and to transport residents of urbanized and rural areas to suburban employment opportunities and work-related training.

The New Freedom program aims to provide additional tools to overcome existing transportation barriers facing Elderly Individuals and Individuals with Disabilities seeking integration into the work force and full participation in society beyond what is currently required under the Americans with Disabilities Act (ADA).

As the designated administrator of both programs, in small and rural areas of the state, SCDOT has reevaluated the program needs in light of limited funding for federal fiscal years 2008 and 2009. In fiscal year 2008, we extended eligibility to the large urbanized area projects in order to facilitate initial implementation of the programs and fully utilized three years of accumulated funding. We are recommending that the eligibility of projects be restored to only small and rural area projects. However, SCDOT still reserves the right to fund projects in the large urbanized areas, if funds are not fully utilized in any given small urbanized area.
