Indirect Rate Proposals

Government Contractors struggle with the indirect rate section of pricing their cost proposals. The Government will want to perform a complete audit on how the indirect rates were computed for the cost proposal before contract award. This audit is typically performed by the Department of Defense Audit Team.

Gov-Con's Indirect Rate Proposal allows your company to simply and manually calculate your indirect rates in order to correctly price future cost proposals.

Our Indirect Rate Proposals come with a complete government compliance package:

- Years Priced out to the period performance of your contract proposing (1yr.—5 yrs.)
- Defined pools and bases computing indirect computations
- Labor Worksheet
- Direct Cost Worksheet
- Indirect Worksheet
- A customized indirect rate methodology for the cost proposal
- Policies and Procedures-supporting the indirect rate methodology
- On-line Training provided (Seminar)
- Consulting services (provided at an hourly

- *rate*)
