Subject: Mr. Yancy McGill.....Let's revitalize our Senior Citizens and have environmental green industrial revolution that stops poisons and chemicals...

Mr. McGill, I would like to get your help on putting Hemp Plastic in Old Westinghouse in Hampton County and Mack Truck in Winnsboro, S. C.. I sent you this paperwork along with Senator Coleman (he was former batboy to Davis) telling you how Mercedes Benz wanted to build 100 Million dollar hemp plastic factory in United States that would employ 4000 people. We have 13 car manufacturers in 600 mile radius that will be using hemp plastic, cardboard, carpet and cloth in their cars by 2017. We need to be the leader in Hemp Plastic.....Cardboard (Sonoco), cloth (Levi is going back to using hemp in jeans this year so we could make cloth), carpet.....

Plywood is what caught your eye when we spoke a few months back. I hand delivered information to your office as Lt. Governor without getting a response. Hemp Plywood has more elasticity, R15 insulation in board, no mold or mildew ever.....You still have plant in Kingstree that is not running?

I lived with my Mother for 41 months with Alzheimer's Disease and have ideas for reducing the growth of Alzheimer's with nutrients from Marijuana Seeds and Buds. I want to treat my on diseases with this too. We have to start somewhere and my IDEAS have merit and backed by England, Spain and Israel..... Going to meet with Harry Ott, Jr., and hopefully,,,,,Senator Coleman, MaryGail Kelly Douglas, Tinkler, Robert Brown and other's next week to try and get Plastic Plant or partnership with Mercedes Benz.....You could help us bring this two billion to South Carolina Citizens that is grown from our earth and manufactured by our Citizens.....Starting Farms, small business and jobs from agriculture instead of SERVICE INDUSTRY JOBS!!
