**South Carolina State Parks**

at 19:39:19 on 12/20/2010 UTC · 🌐

If you are camping in a state park tonight, wake-up around 2:40am, brew some coffee and sit by the fire. With clear skies you should be able to witness a total lunar eclipse. Parks are perfect places to watch these heavenly spectacles, as there is little to no light pollution. If you miss this one, plan ahead for 2011 as there will be lunar eclipses in June and Dec – make plans to view them in a state park!

**Rosemary McChesney** Do you have to be at a park to see it...Im in FLO, SC. Tks!!

at 20:15:58 on 12/20/2010 UTC

**South Carolina State Parks** No, you should be able to see it across the state, as long as the sky is clear and there's no distraction from the city lights. Parks just make great places for viewing events such as these!

**Rosemary McChesney** Thank you I will set my alarm..tks, ....

at 21:25:29 on 12/20/2010 UTC

**Beverly Simmons Shelley** Here's a cool article about tonight's lunar eclipse....<http://news.nationalgeographic.com/news/2010/12/101220-lunar-eclipse-winter-solstice-2010-science-shortest-day-first/>

at 21:37:01 on 12/20/2010 UTC

**Patti Wygant** cant wait for tonight, bought hubby a telescope for christmas and we are gonna use it even though you dont need it for this one but maybe a stray meteror or too will pass by

at 22:04:08 on 12/20/2010 UTC

**Sue Ann Tarkenton** Hope the sky stays clear in the upstate!
