---

Hey Chaney,

Below is what Matt was able to gather from the Michelin team. Still unclear on the number of S.C. expansions, but they did supply a fact sheet that might be useful. The word they used was re: expansions was "multiple."

Let me know if you need anything else on this!

Thanks,

Adrienne

Subject: Michelin Information

Hello Matt,

Susan said you wanted information on Michelin in the United States.

As you may know, South Carolina is the state with the most Michelin employees and manufacturing facilities at 9. (Please note these are manufacturing facilities.) We also employ more people in the state than anywhere else in North America, at about 9,000.

If you need further facts and figures, here is a site that is updated: <http://michelinmedia.com/mna-fact-sheet/>

Best,
