Subject: Insurers and Government Slavers Drivers - Website email from Richard Frates

---

Obama-Car Bail out, No Repeal, instead, Government and Insurers, Create Slave-Dependents: Politicians are using language like "Everyone must be in the pot" but, they will not climb in the pot themselves. The bigger the pot the easier it is to hide excessive charges by insurers and health-care providers. Lawmakers and staff, and the millions of federal and state employees, will be the only Americans who are free from being, slaves to, government, Insurers and Health-Care providers. Special consideration will be made for big unions that pay politicians for protection. Making health-care law that only apply to others; guarantees exploitation and bondage of others; effectively, creating Slaves to Insurers. Insurers do not price shop; they are happy to overpay whatever is billed by health care providers and then increase insurance premiums. Excessive, Health-Care cost are inflicted on Americans by: Regulations created by Lawmakers, Insurers, Health care providers, Lawyers and the insured that do not have any out of pocket cost. Example, big unions, Lawmakers and staff, the millions of federal and state workers. Ryan and Trump agree to pay Insurers tax payers dollars in the form of tax credits for those who purchase insurance. That will guarantee higher health care cost, especially for the poor; and encourage Insurers hospitals and all health care providers to charge more. Insurers pay Politicians hundreds of millions and are getting tax payers dollars in return. Americans are being sold into slavery for political donations. Insurance Slave-Masters, accelerate the cost for protection; being willing to over pay for health-care; making it impossible for individual to pay the health care provider themselves; that is bondage of the masses. Republican agenda: Insurers Must Make a Lot of money! Americans are being plundered: A family of 4 can - pay insurers - 10 thousand or more per year for Nothing. Example 400 per month insurance premium, 5 thousand per year co-pay; before they can use health care services. That is criminal, but legal, because of government regulations, insurers, health care providers and lawyers. Republicans and democrats, promoting the concept that everyone must - pay an Insurer for the privilege of seeing a doctor - is bondage and surrender to the outrageous insurance and health care charges imposed on Americans. Most doctors today have become over- paid drug pushers; the side effects are of many drugs are more dangerous than illegal drugs. Lawmakers should create conditions that allow the average person to pay for heal care as needed themselves. Insurance promotes higher health care cost. I needed dental work many years ago; the Doctor told me that insurance paid 1,200 for the work I needed but he charged 600 because I did not have insurance. He had a large group of - state workers - he cared for, who had no out of pocket cost. It would bring down cost if everyone who has insurance had an - out of pocket " 50-dollar co-pay charge every time they visited a hospital or doctor; 100-dollar co-pay for federal and state workers, because other pay most of their insurance cost. That would be better than a 5 thousand a year co-pay; and would only apply to those who use health care services. Even welfare recipients should have to pay 40-dollar co-pay each time they visit a doctor so they will not overuse health care. I received this email reply recently: Richard, Thank you for the e-mail. When my son was born back in 1993 I paid the hospital \$900.00 because I had no insurance. I asked them how much they would have charged an insurance company for the same services and they told me \$5,000.00; Joel, Legislative Aide. You chicken-hearted republicans, do what we sent you to do: Total Repeal of Obama-Care. Freedom and competition would be the replacement. That would be much better than putting "everyone in the pot" that you will not climb into yourselves. Why is - Robbing Americans, by creating conditions that force everyone to pay off insurers, to see a doctor, the agenda of politicians today? Instead, their objective should be.

creating conditions that enable individuals Americans to pay for health care as needed themselves. But, then they would need to unravel the tangled web of payoffs by insurance lobbyist, unions and government regulations that favor one group or another. Richard Frates " seedsoftruth@chartr.net
