Subject: Too Much

SCHAC:

I told you in a prior email that all this aggravation was not doing anything for my health because of medical concerns. I became very ill on Thursday night and all day Friday with headaches, chest pains, vomiting, right leg and foot weakness. I went to Orangeburg Emergency Room for extreme headaches and chest pains at 3:00 am. I do know that the events of 11/20/2014 cause me to go into an emotional distress to be treated like a common criminal. I was provided an x-rays and given pain medicine. I am at home resting but still feeling very ill on today therefore may need additional medical care.
