Gentlemen,

Of the people in this world that I know, among the three of you I am most confident I will get the best and perfect suggestion

I am in need of a consulting firm of process engineers who can square away all permitting and information management for the environmental side of the agency. I know exactly how I want it to look, but there are not enough minutes in the day for me to retain my current position and fix it.

The individual or team needs to include a little legal acumen (the ability to refer to the federal and state statutes and regulations); knowledge of what is possible from information systems and technology; and most importantly, most importantly, a sharp eye for creating efficiencies and transparency for customers and employees.

We are investing in an epermitting system that should accomplish what we need, but I am terrified that we are getting ready to program over bad process.

If you have anyone in mind, please let me know. Otherwise, I hope you are all doing well and hope to see you soon!

Take care,
Catherine
