The Honorable Nikki Haley, Governor SC  
Office of the Governor  
1205 Pendleton Street  
Columbia, South Carolina 29201

Dear Governor Haley:

Further to my letter to you and Clemson folks in early October informing you of intent to return to SC after 46 years as your epic 180 degree told me the time was now and the challenge immense for us all.

Not only is our common bond Clemson and the pulling together of black and white to a more perfect State but is the dealing in numbers as accountants and engineers as we mutually Walk the Walk of reality and refrain from Talking the Talk, the pastime of Lawyers and Policy most often lacking the numbers required to refine bullshit to a plan.

In my numbers I approach you as CEO of a about 200 billion business with impressive Growth from 138 in 2006 CPI adjusted. As a state of mean family income 44k among the top in South (NC 42K) and with cost of living low, so much better than when I parted as we continue to pray and pull our selves up by the bootstraps from the devastation of our battle for Independence and not to overthrow the Union. The great failure of all in Congress was not to establish an indentured servitude system as Spanish did in Cuba and a precedent on the very Mayflower. But that is not the mentality/training of barristers as our own SC Bully Brooks broke his cane over one Yankee gent's head sending him off to Europe for med care where today we would all yearn to be for the price. Please if time allows a must read: The Worth of Nations Thomas Freidman of UN rating 12 rich nations on factors that lend to Happiness Factor and the Gini Coefficient of Nations. US ranks Dog on health care and Teddy/ Taft would have busted the cartel of hospitals and put price control on Docs/hospital via government fiat as they did on railroads, gasoline and beef, The real problem of the kindly but dumb ACA effort in establishing demands for A cadillac for price of Ford when obediently offered by bright actuaries it was made out of papern<sup>o</sup>t metal with 58% increase in deductables across the board. Max Baukus branded it train wreck, a dem perhaps of accounting expertise??

Pardon diversion but it is great to see Trump's priorities and I never saw his concern
