Subject: FY 12-13 Spending Cap

Josh,

When you get back...we have to start getting a handle on what's available revenue-wise in FY 12-13. What do we expect FY 12-13 receipts to look like, what would our spending cap number be then, what are the different ways to calculate the cap depending on how you score this year's SUTA deal, etc.? If you could pull those initial projections together on Monday or Tuesday, that would be good. We'll start getting spend requests from the agencies in the next few days, so we've gotta start trying to make the other side of the balance sheet less hazy.

Emailing you now so that I can't forget to on Monday. :) Thanks.

CLS
