Subject: BP America Chairman call to Governor Haley

Nicole –

Just left you a voice mail at the office but also wanted to touch base via email because of timing sensitivity. I've just in the past hour gotten word that John Mingé, the Chairman and President of BP America, would like to put in a brief call to Governor Haley this evening or tomorrow to discuss the floods and the relief and recovery efforts.

Just as information if it is helpful: BP's Cooper River Plant in South Carolina is a petrochemicals manufacturing facility with approximately 225 employees and 250 contract workers. We are located on 6000 acres in Berkeley County just outside of Charleston and have been operational in South Carolina for nearly 40 years.

Much as I hate to be a pain after hours in the middle of what is no doubt another crazy week for y'all, I was hoping to see what the best contact information was for him to reach out to her so that I can provide it to his staff.

Appreciate so much any help you can provide! If you need additional details from me, please let me know.

Thanks,
Hope
